Pricing & Next Steps

The Vision for Zscaler

Tackle Our Inefficiencies

As we move away from our current Strategy, we will focus our efforts on optimizing our current process. This includes budget allocation, OCT, & Account Management.

Optimize for Growth

Every ad moment will rely on our TAM development process. Mastering this list & forming strategic segmentation will unlock ad personalization & customer activation.

Enterprise Support

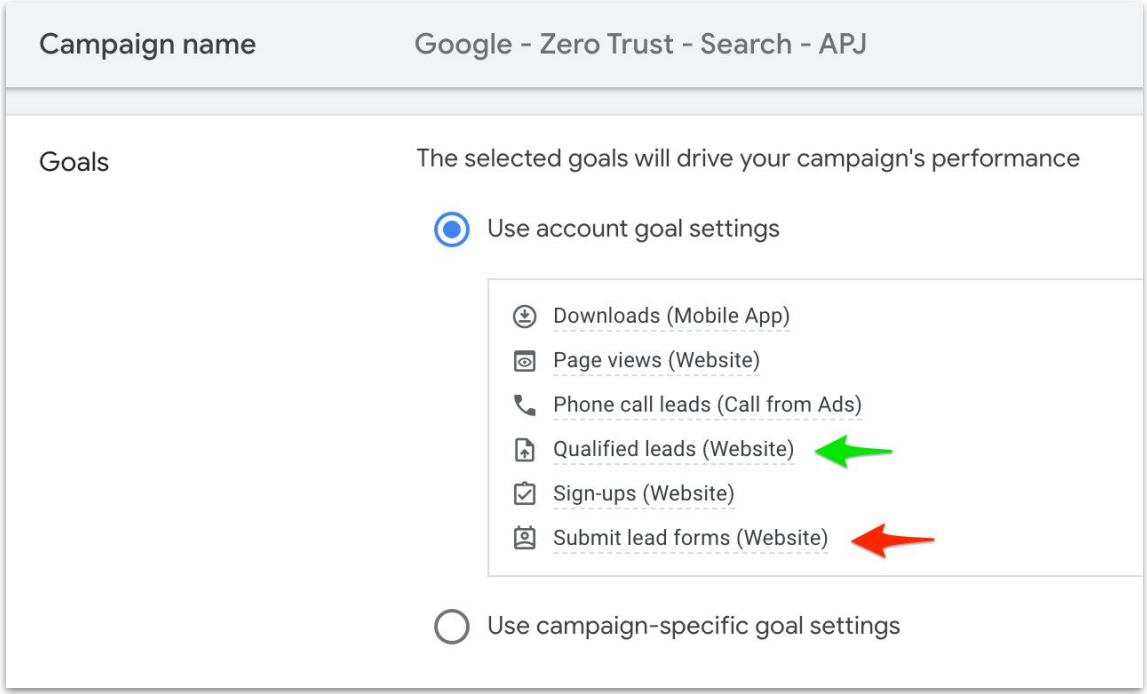
From first touchpoint to closed deal, we design with measurable impact in mind to capture your customer's attention and inspire them to take action.

Tackle Our Inefficiencies

Efficiency Drives Growth

We have Multiple OCT & Conversion Actions setup within our platform. This can dilute our overall conversion rates we actually care about.

If we want to push the envelope in our space, we need to focus on results that matter the most (SQLs & Opportunities).



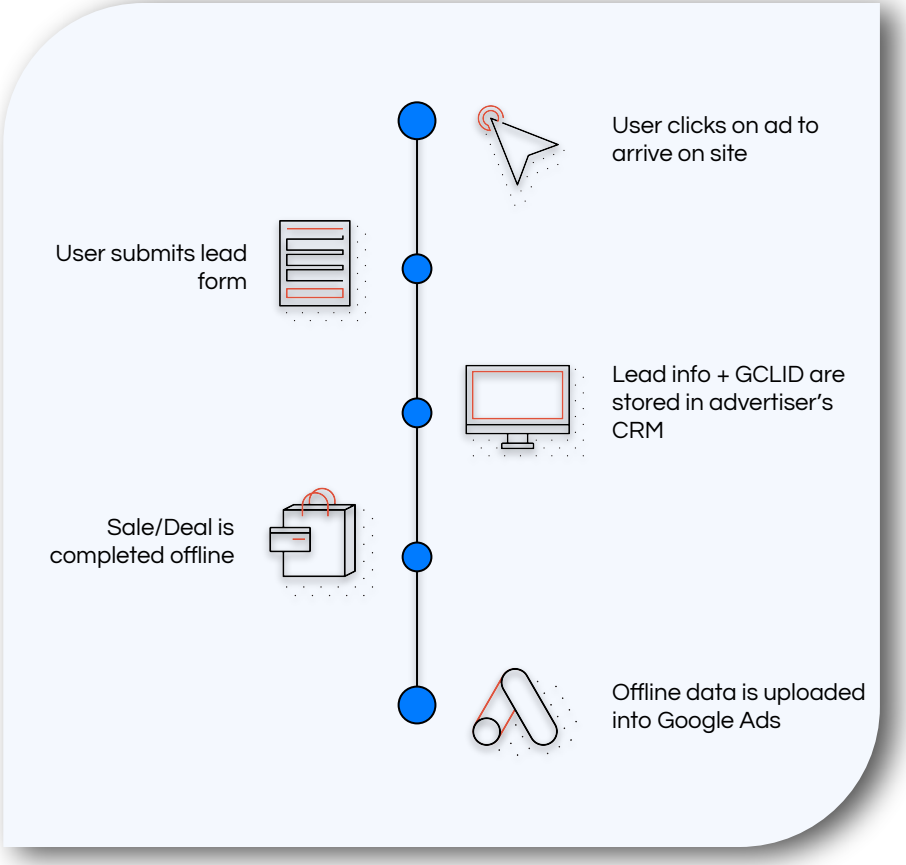
Tackle our Inefficiencies

Offline Conversion Tracking

To Optimize for Pipeline, not Form Fills

Google's machine learning capabilities are only as good as the information we provide it.

By integrating your CRM we can feed back our conversions into Google ads to fully understand and optimize which sources are having more success in creating MQLs, SQLs, and opportunities and revenue.



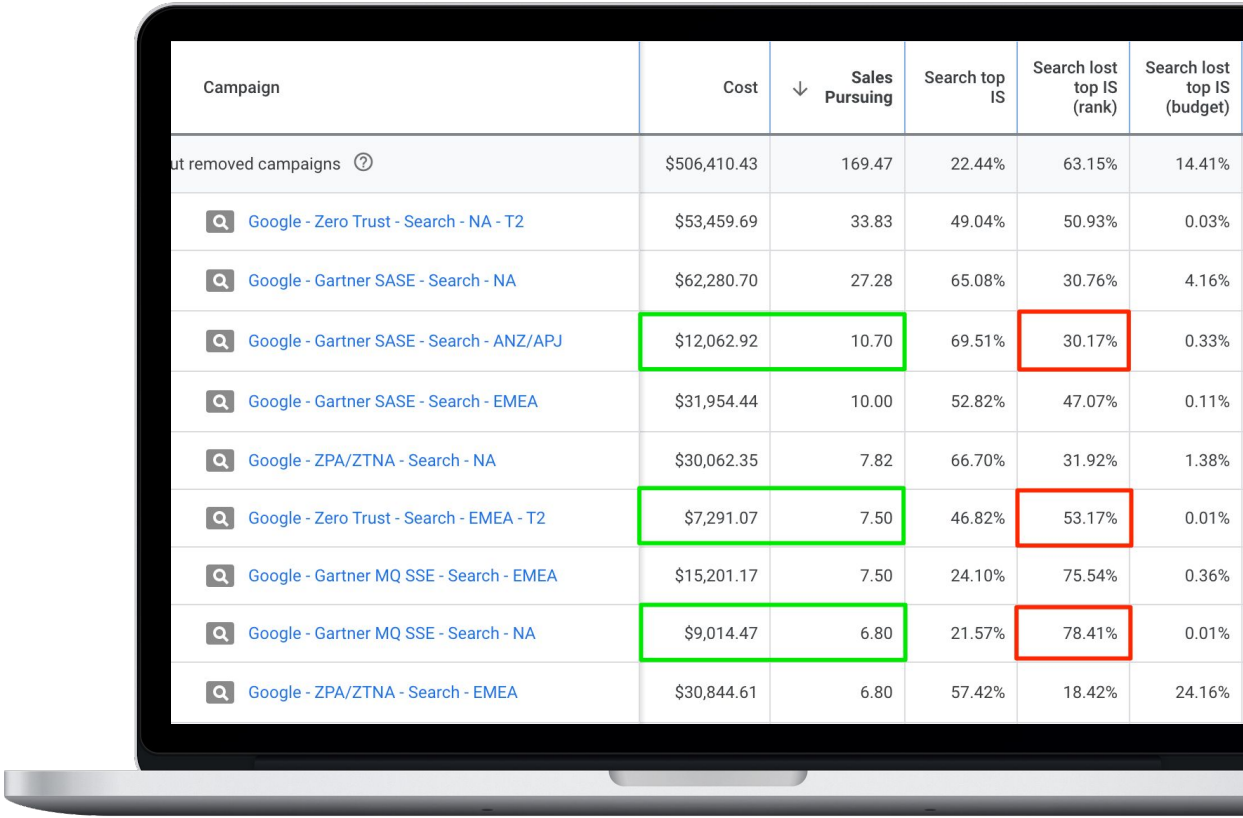
Budget Allocation

Impression share is one of the most powerful metrics when it comes to determining the potential growth of a Google Ads account.

To find the right areas to scale, we added the “Sales Pursuing” custom column and sorted by volume. From there, we found the campaigns that had high Sales Pursuing volume and relatively low spend.

These highlighted campaigns are losing impression share due to rank, meaning we can increase our bids and receive more Sales Pursuing leads below the average cost per in the account.

Tackle our Inefficiencies



Campaign	Cost	Sales Pursuing	Search top IS	Search lost top IS (rank)	Search lost top IS (budget)
ut removed campaigns	$506,410.43	169.47	22.44%	63.15%	14.41%
Google - Zero Trust - Search - NA - T2	$53,459.69	33.83	49.04%	50.93%	0.03%
Google - Gartner SASE - Search - NA	$62,280.70	27.28	65.08%	30.76%	4.16%
Google - Gartner SASE - Search - ANZ/APJ	$12,062.92	10.70	69.51%	30.17%	0.33%
Google - Gartner SASE - Search - EMEA	$31,954.44	10.00	52.82%	47.07%	0.11%
Google - ZPA/ZTNA - Search - NA	$30,062.35	7.82	66.70%	31.92%	1.38%
Google - Zero Trust - Search - EMEA - T2	$7,291.07	7.50	46.82%	53.17%	0.01%

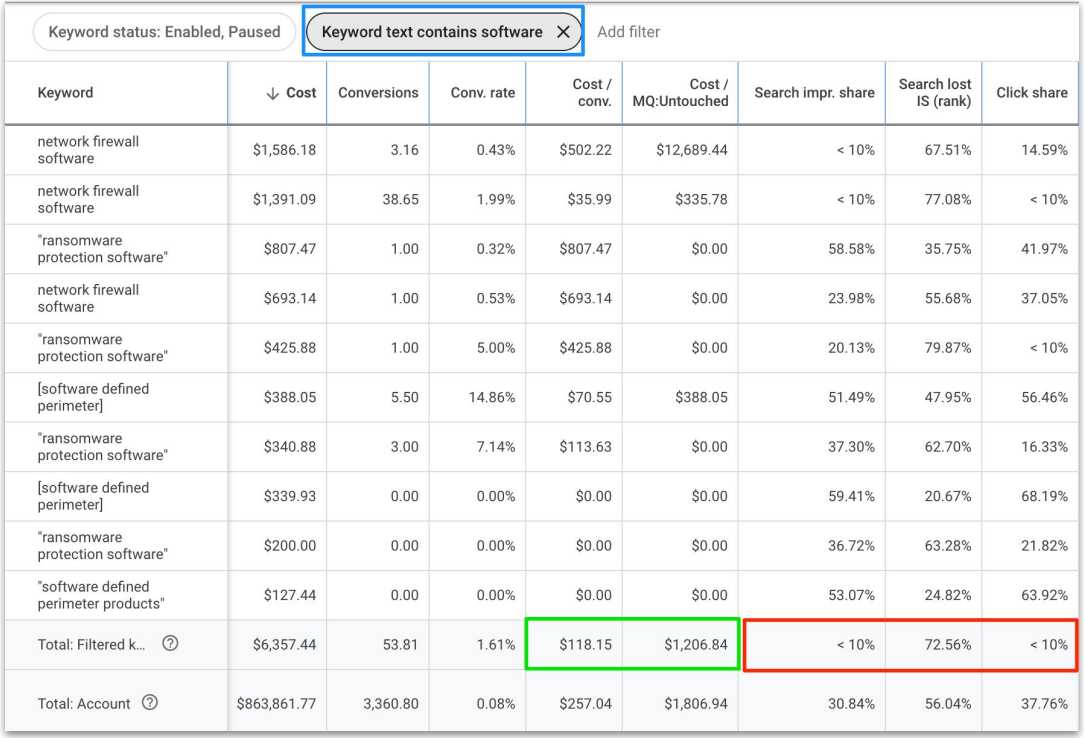
Google - Gartner MQ SSE - Search - NA	$9,014.47	6.80	21.57%	78.41%	0.01%
Google - ZPA/ZTNA - Search - EMEA	$30,844.61	6.80	57.42%	18.42%	24.16%

Controlling Impression Share for BoFu Intent

Separating solution research intent from educational intent will be a large part of our ideal restructure with Zscaler. As it stands today, both categories of intent are within individual campaigns, making it difficult to control impression share for our most valuable keywords.

We found that keywords including the term "Software" resulted in a cost per MQL $400 lower than the account average. However, impression share and click share are below 10%.

Moving BoFu intent into separate campaigns will allow us to implement bidding strategies that only go after our desired pipeline stages.



Keyword status: Enabled, Paused | Keyword text contains software | Add filter

Keyword	↓ Cost	Conversions	Conv. rate	Cost / conv.	Cost / MQ:Untouched	Search impr. share	Search lost IS (rank)	Click share

Solution Directory SEO Audits to Inform Bofu Intent

Creating solution intent campaigns by utilizing pipeline performance within the account will be phase 1 of a restructure.

In order to expand these campaigns, we will tap into the search engine indexing of top solution category directory pages. These sites and pages rank extremely well for solution research intent across all of our solution categories.

The example on this slide reveals the BoFu intent for Zero Trust Security Solutions. We would expect these terms to generate pipeline in the immediate future.

Organic Research: https://www.trustradius.com/zero-trust-security-solutions

Keyword	Intent	SF	Pos.	D...	T...	Vo...	K...	CP...
zero trust software	C	+4	3 → 3	0	36.11	170	53	21.2
zero trust vendors	C	+5	8 → 8	0	16.66	260	58	24.3
ztna vendors	I	+6	6 → 6	0	8.33	90	53	27
ztna solutions	I	+3	6 → 6	0	5.55	70	58	26.4
best zero trust solutions	C	+3	5 → 5	0	5.55	50	45	22.2
zero trust security solutions	C	+4	7 → 7	0	5.55	70	69	22.8

zero trust security companies	C		5 → 5	0	2.77	40	45	19.8
zero trust security vendors	I	+3	7 → 7	0	2.77	50	40	22

Keeping a Close Eye on Competitor Investments

Using our paid media auditing tech stack, we can quickly identify gaps within our auction investments when compared to the competition. These gaps are broken out into categories so that we can hone in on keywords that our top competitors are bidding on and we are not. For example, we noticed that Netscope and Tessian are heavily invested in DLP related keywords.

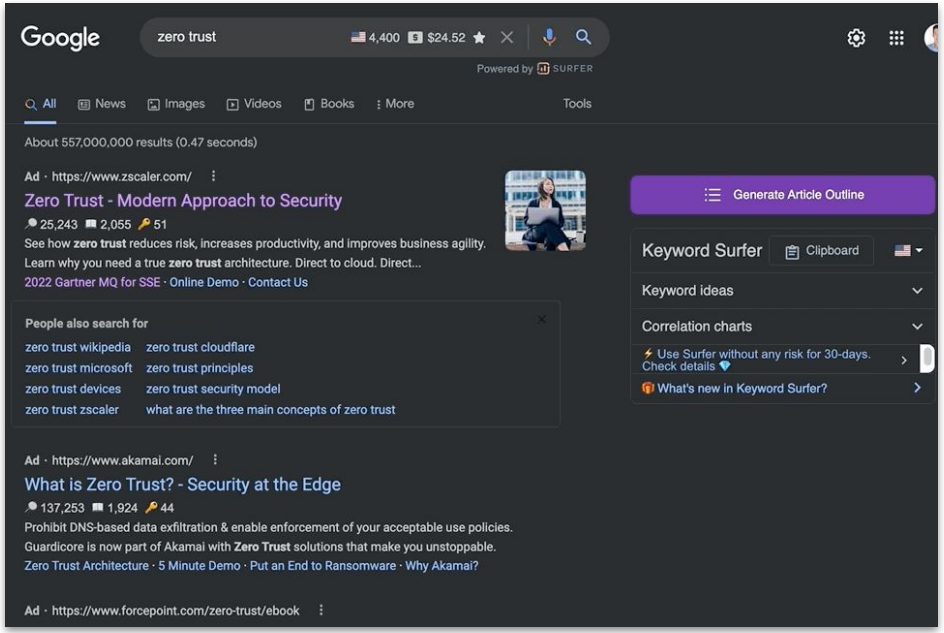
Positioning Education vs. Product

Knowing that we have always on keywords within the account, we want to take a look at how we can better service ToFu intent. Using conversion and pipeline performance as an indicator of intent and content alignment, we believe that our high volume category terms should be going to education content and not product content.

Keyword	↓ Cost	Sales Pursuing	Conversions	Conv. rate	Cost / conv.
[zero trust]	$21,622.05	0.20	5.73	0.47%	$3,771.29
[zero trust security]	$6,588.31	0.00	0.00	0.00%	$0.00
[zero trust architecture]	$5,235.39	0.00	3.40	0.96%	$1,539.82
"zscaler zero trust"	$1,393.28	1.00	11.71	5.52%	$119.01
[zero trust exchange]	$62.16	0.00	0.02	0.09%	$3,108.00



Keeping Up With Ad Copy Testing

We noticed a massive opportunity to place a deeper focus on ad copy testing. Within the NA Branded Keyword ad group, there are a handful of ads that have high spend in recent months yet are far more inefficient when compared to the top performing ad in the ad group.

When analyzing copy, we noticed that the top performing ad has a very clear and enticing CTA within the tail end of the ad copy.

Although expanded text ads are now frozen in Google, we can test this style of ad copy within new responsive ads throughout the account.

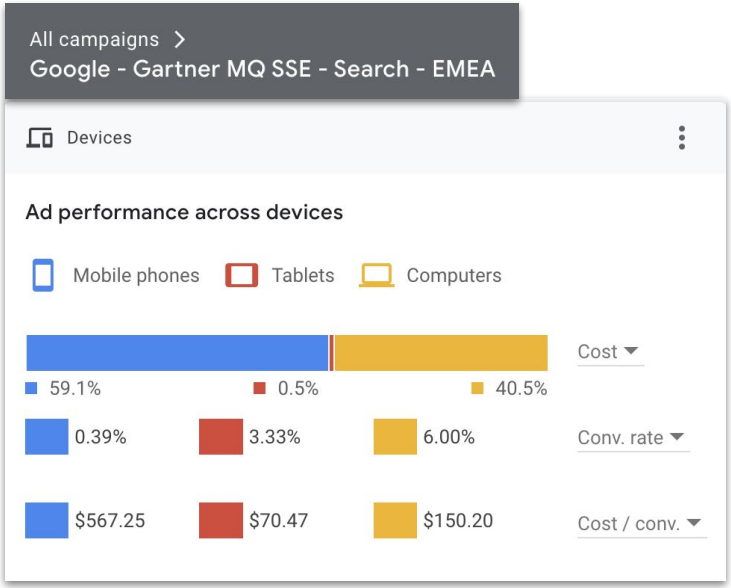
Fixing Mobile Performance

Mobile conversion rate and cost per conversion is an issue throughout the search campaigns.

Using the EMEA Gartner MQ SSE campaign as an example, we can see that the mobile web experience is resulting in a nearly 4x cost per conversion when compared to desktop.

We believe that the low conversion rate on mobile is coming from the poor web experience. As you can see from the GIF, the form is below the fold and the form buttons throughout the page take you to a block of text, and not the form.



Understanding Quality of Awareness Targeting

Google is light years behind other channels when it comes to sophisticated and accurate audience targeting for B2B tech and security segments. Although you are leveraging best practice custom audiences within your video campaigns, we are concerned with the basic demographic contrast between your branded search traffic and video views. This data sends a strong signal that the awareness targeting is not reaching the desired ICP.

Paid Social

Engage and convert your customers on every social media platform that matters to them.

We execute sophisticated social media campaigns, optimized for budget and conversions. This includes LinkedIn Conversation Ads, Facebook & Clearbit integrations, gift card & incentive campaigns and more.

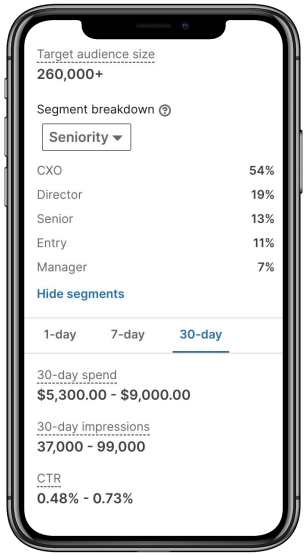
Channels

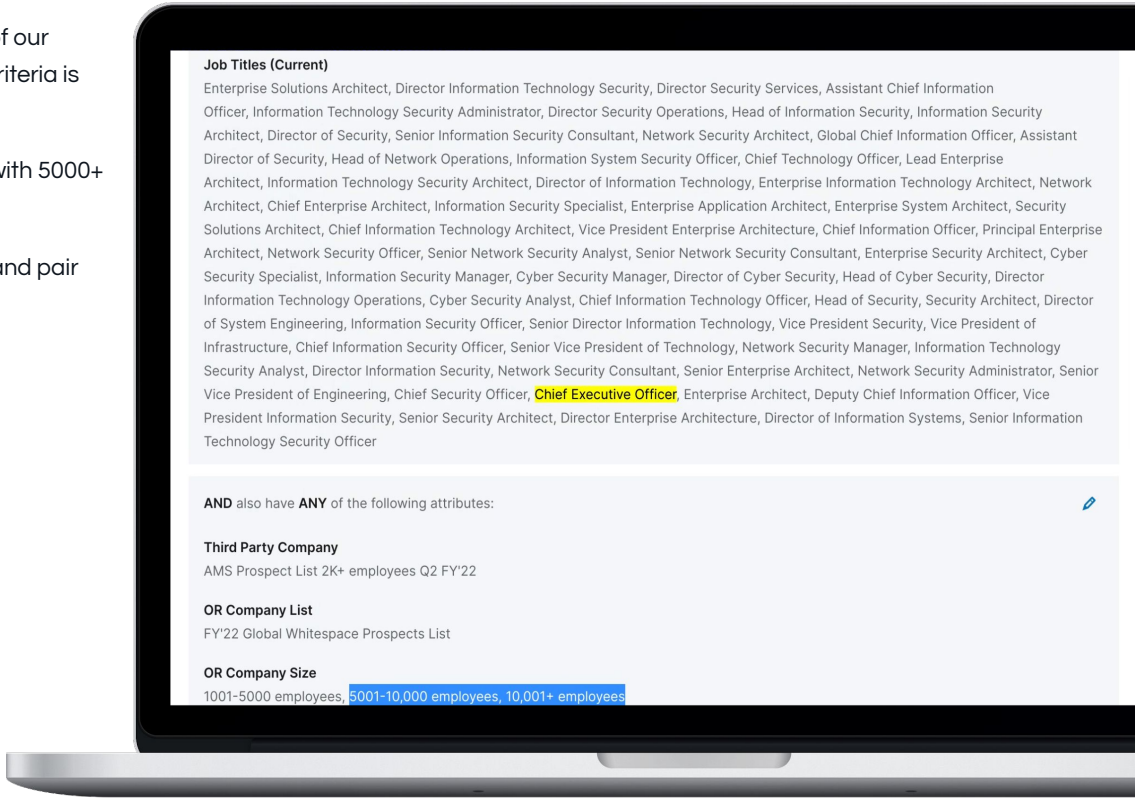
Historical LI Targeting

When analyzing historical LinkedIn targeting, we found a majority of our campaigns are much to broad in our targeting. Relying just a few criteria is not enough to be impactful.

A perfect example of this would be targeting CEOs at companies with 5000+ employees, while also going after Network Security Consultants.

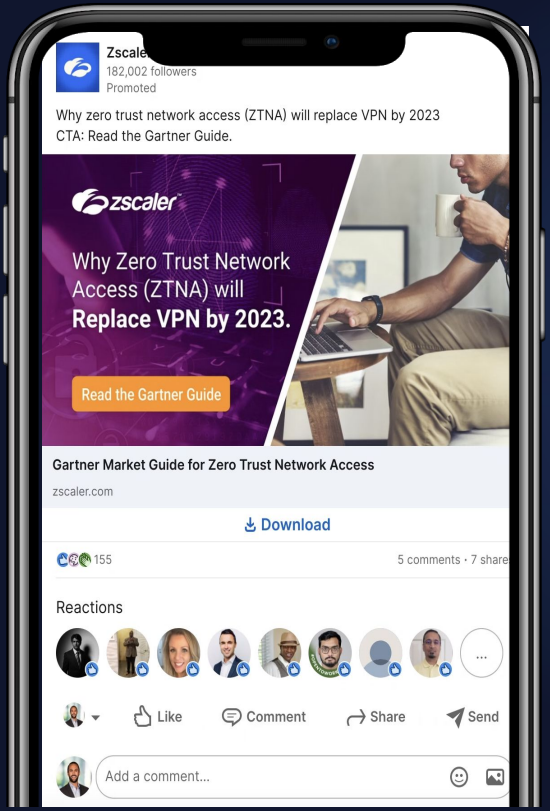
At Directive, we build custom company lists to go after in LinkedIn and pair those lists with specific job titles.

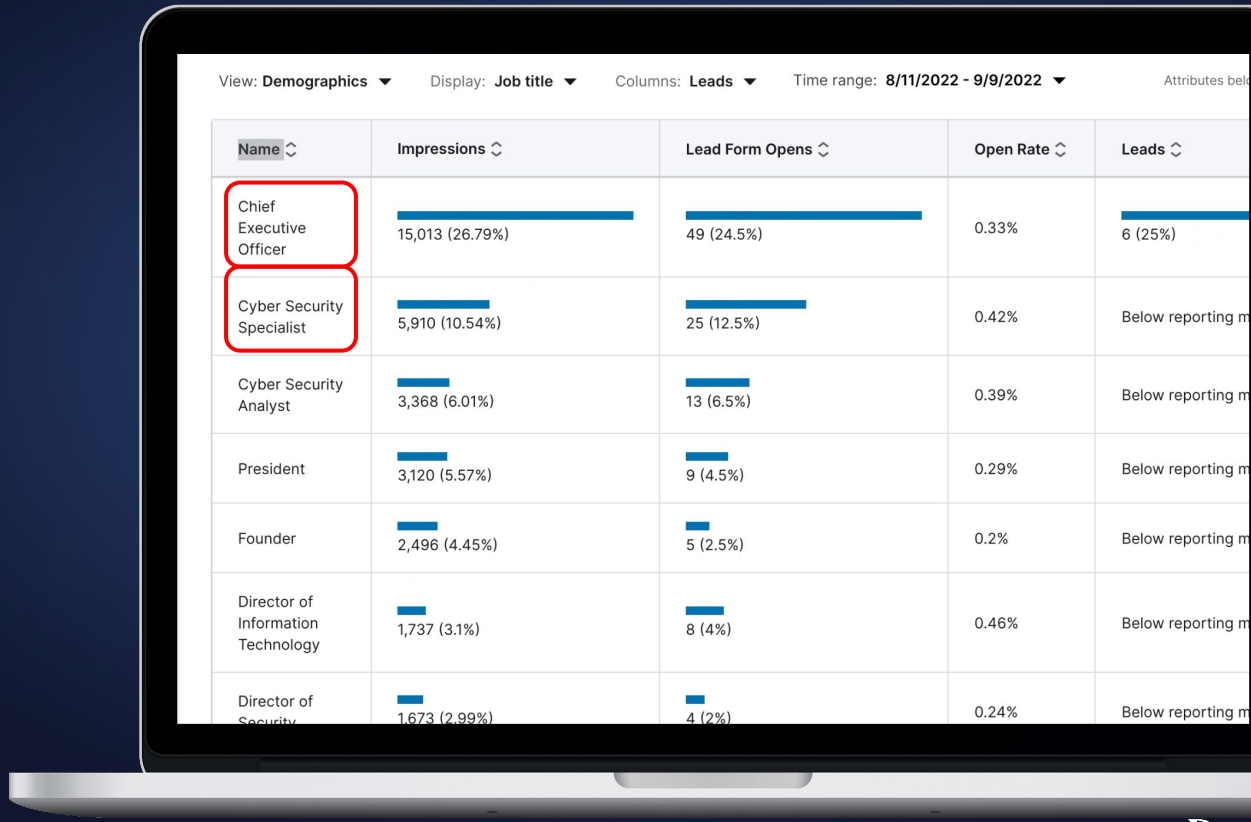




Tackle our Inefficiencies

Realities of LI Targeting



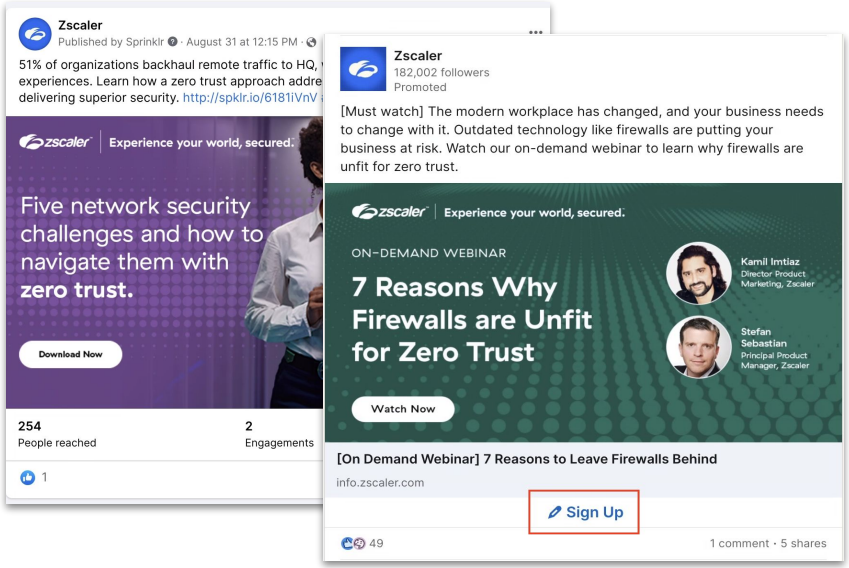


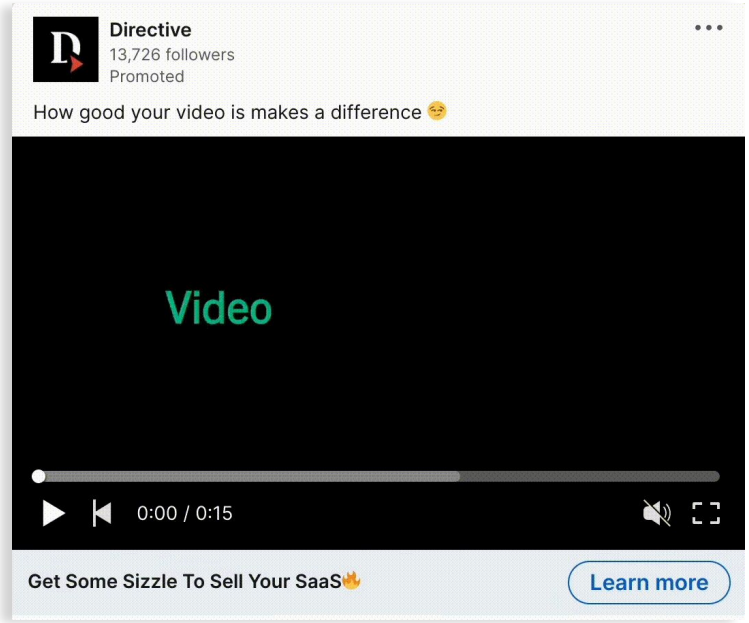
Tackle our Inefficiencies

Consistent Brand Message

We believe in the power of moving decision makers from *Apathy to Action.*

To do this, we need to be putting out content that makes people wonder if they are doing their job if they choose not to interact with the post.





Tackle our Inefficiencies

Optimize for Growth

Discover Indicators of Revenue

Enriching current customers as well as pipeline will allow us to find trends within your ideal customer profile.

We leverage these trends by using them as search criteria in our TAM building platforms. We segment your first party data by revenue so that we can develop tiered TAM lists with different ranges of projected revenue.

Organization Name	Closed Won Amount	BuiltWith - Active Tech Count	Company Revenue	Employee Count	CB Rank (Company)
Account 1	$500,000.00	70	$110,000,000,000.00	10001	2310

Customer Enrichment Outcomes

Once we enrich your customer base, we will start analyzing contextual data trends within the list and connecting them with revenue.

The goal of this process is to discover high revenue trends that also have a high volume of accounts.

Looking at the example table, we see 1-50 acquisitions as a quality data point to go after when building a list of net new companies to target.

Segment	Contextual Data Point	Avg CARR	Filter Count	% of Total
Number of Acquisitions	1-50 Acquisitions	$126,912.16	38	17.35%
Number of Investors	11-20 Investors	$125,709.58	26	11.87%
Last Funding Type	Series A,B,C,D,E,F	118,990.08	65	29.68%
Number of Apps	1-25	$140,673.61	25	11.42%
Last Funding Amount	$1-$200,000,000	$94,833.62	94	42.92%
Last Funding Year	2016+	$88,758.74	117	53.42%
Funding Rounds	1-10	$93,585.29	126	57.53%
Funding Status	Late Stage Venture	$144,966.67	15	6.85%
G2 Total Products Active	1-150	$105,605.08	153	69.86%

Builtwith Tech Count	75+	$131,313.75	42	19.18%
Revenue Range	$10,000,000 - $50,000,000	$136,783.98	29	13.24%
Employee Count	101-250	$152,392.83	35	15.98%
Monthly Website Visitors	> 1,000,000	$148,666.00	26	11.87%
Total Unfiltered		**$90,717.76**	**219**	**100%**

Integration Based Segmentation

To create a personalized experience across ad platforms, we'll want to take a segmented approach. We can take this even further by leveraging technographic segmentation.

Technographic targeting is a great way to narrow your audience down to an audience that is likely to use your products and solutions.

This is done by building out audiences specific to your stack of integrations.

Current Integration Partners

Manual Verification

Rather than just relying on data providers, we will manually verify the members of your TAM that we want to go after.

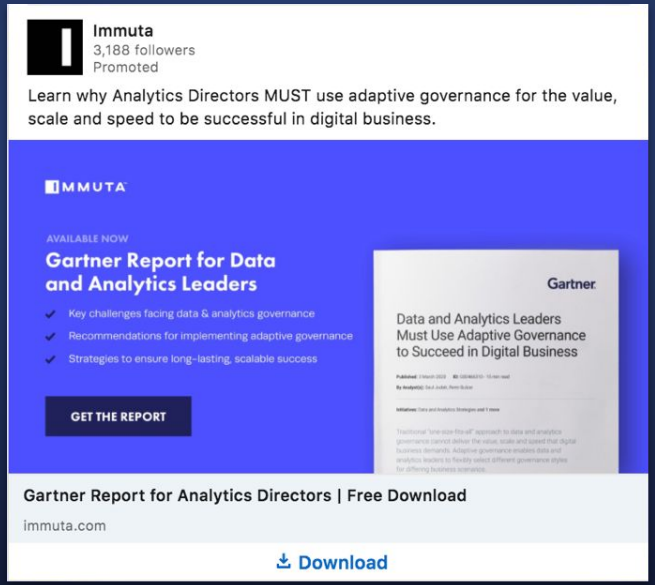
		Not sure? Tell me more	What's holding you back? When it comes to audience generation and sales enablement, precision matters. This is why our b2b database has 3 billion profiles, and over 100 unique data fields. 📈 On our call, our engineers can help identify precisely what data is needed to unlock🔓 growth for your team, and even better, we'll give you an $XX gift card for letting us show you the potential of your product. You in? 👍	**Okay, I'm in!**	Talk to Us Form	

Single Persona Campaigns

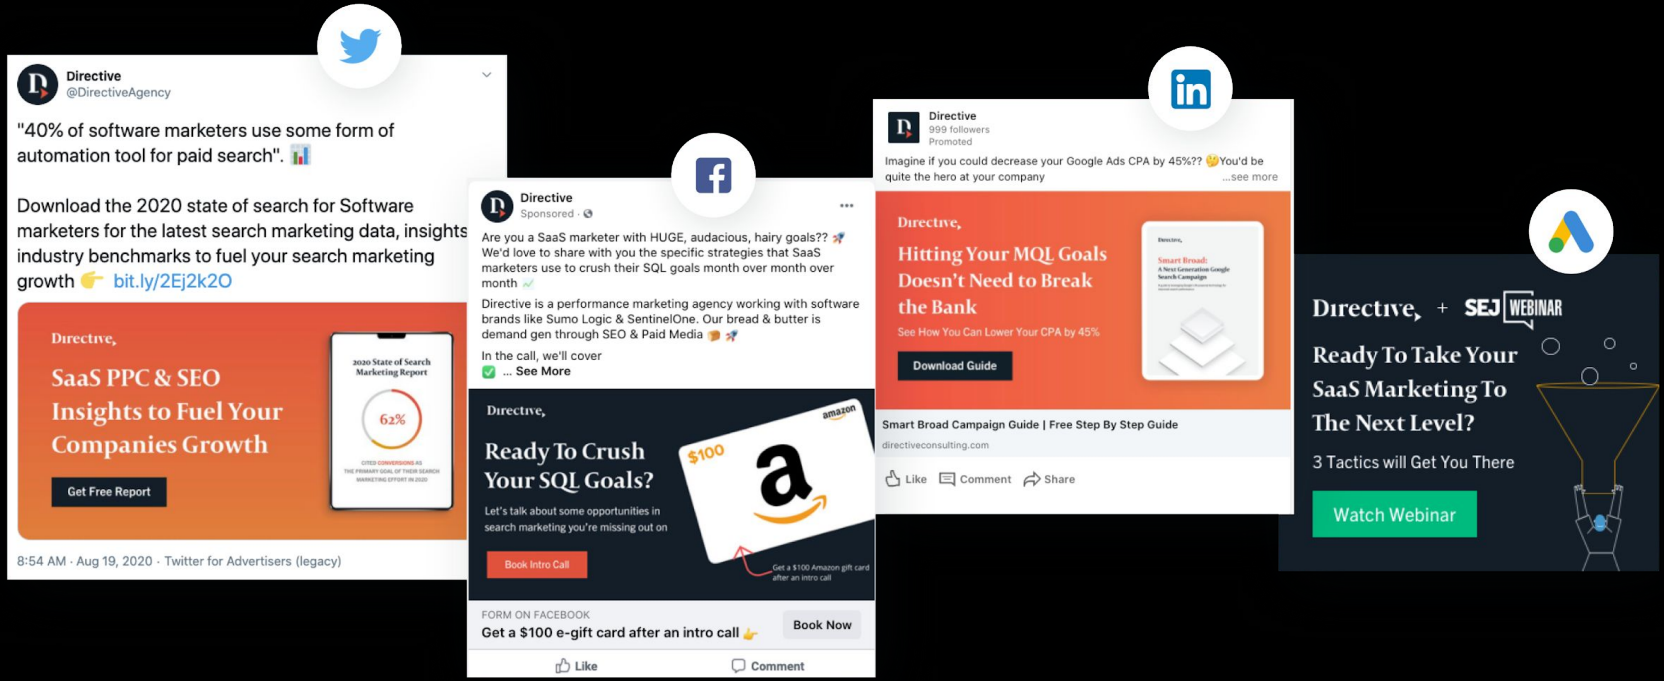
Unique Ad Copy and Creative

Utilizing Single Persona Campaigns allows us to maximize the potential of our content pieces. By creating specific ad copy and creative for our unique ICPs, we can drive higher engagement without needing to scale content.



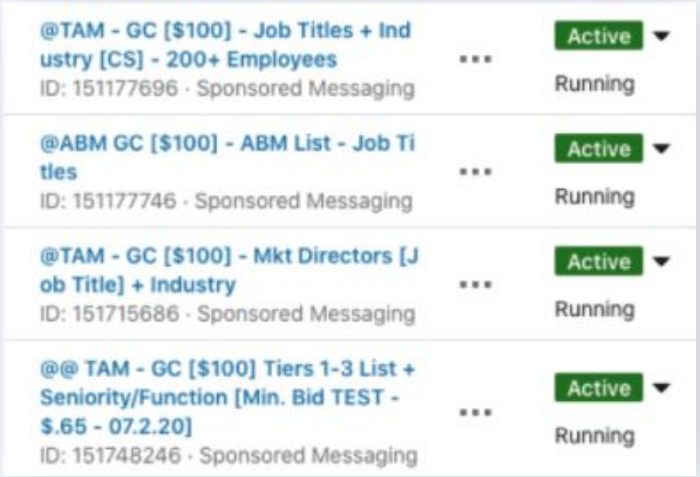
Omni-Channel Message Alignment = Social Done Right

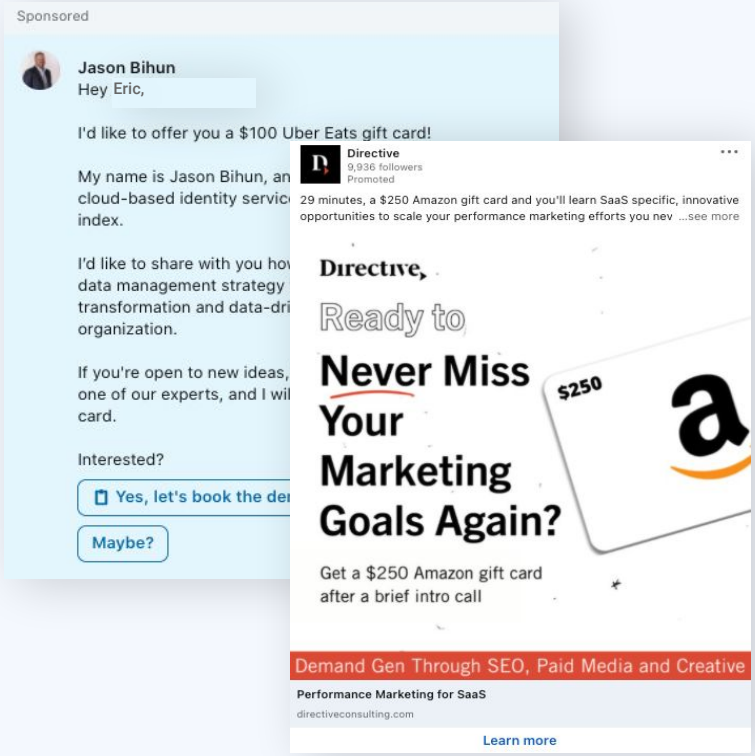
Once we have your TAM and a full funnel lifecycle set up, it is time to get in front of your ICP wherever they are so you can be top of mind.



TAM Development + Segmentation

Stemming from our target account research and messaging development, we create tiered and persona based campaigns across multiple ad content types in LinkedIn.



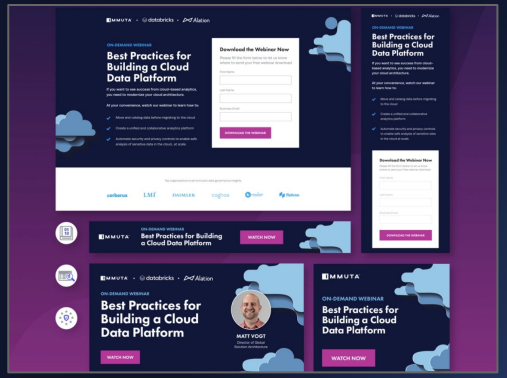


ONGOING SUPPORT

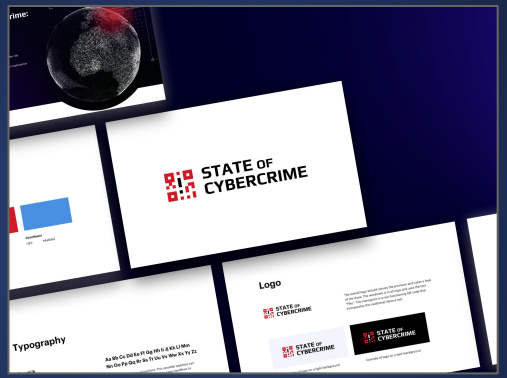
Customer-Led Design

Customer-Led Design captures your customer's attention and inspires them to take action.

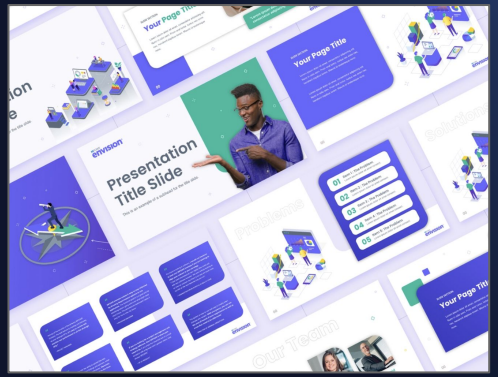
From first touchpoint to closed deal, we design with measurable impact in mind at every stage of the customer journey.



Web Experiences



Branding

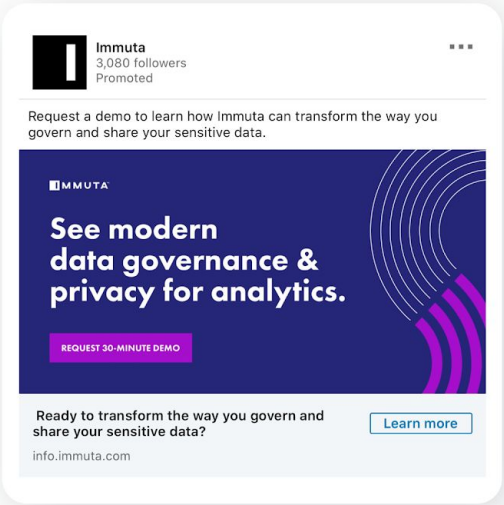


Sales Enablement

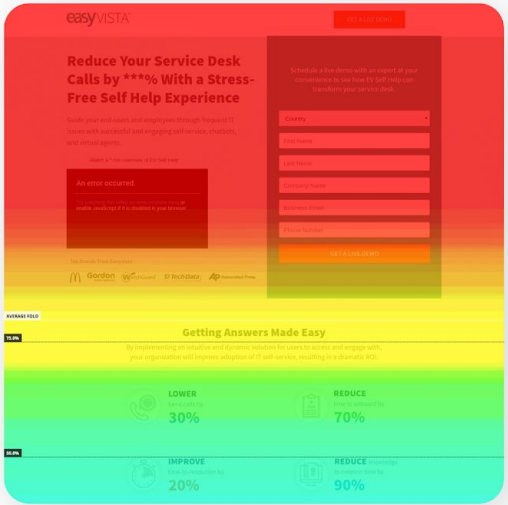
Optimize for Growth

Creating Experience that Works

Each element designed to perform together



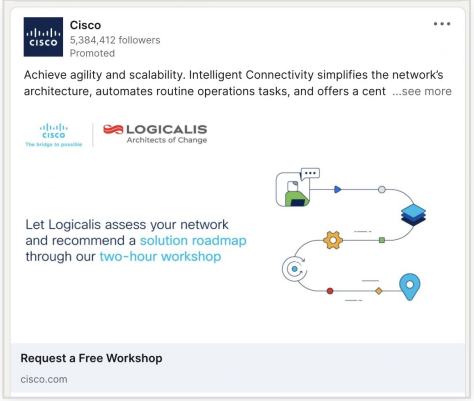
Reach extended with your unique SaaS brand voice



Data-driven creative choices with insights

First Impressions are **Critical**

How do we best present our audience with the information they need when they aren't already looking for it? Capturing the attention of our audience in the right place, at the right time, and with visuals & messaging that resonate with them is how we move them from apathy to action.



Our Key Tools

Our team's goal is to continue to find areas of opportunities for optimization based on qualitative and quantitative research. Conducting different forms of analysis allows us to identify what core user behaviors and tests we should implement every quarter. After identifying patterns of user behavior on landing pages, we design personalized experiences for ongoing optimizations.

LTV:CAC Models Will Become Our Compass

Personalization is a Need to Have

When looking at current Social Ads, we noticed a lack of audience segmentation on the ad level.

Leveraging segmentation capabilities within our targeting will unlock personalized ad experiences that achieve maximum engagement within our target market.

Segmentation examples:

- Industry
- Job Title or Function
- Technographic Makeup
- Company Growth Stage

Directive Drives UK & DACH Region Growth for Leading UGC Management Platform

Paid search account restructuring & optimizations lead to massive improvements in key metrics quarter over quarter

Region	CTR	Conv. Rate	Search Impression Share
UK	+47%	+79%	+111%
France	+1,611%	+84%	+5%
Germany	+1,356%	+112%	+3%

Our Team Is An Extension of Yours

Directive's remote-first culture enables us to tailor our support based on your team's time zone & preferred hours

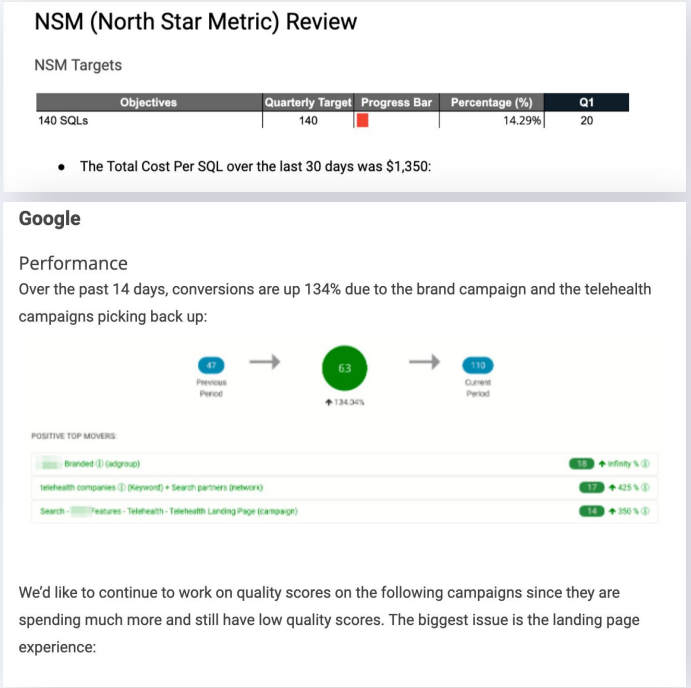
We have boots on the ground in the UK for region-specific questions and major emergencies outside of your direct team's hours

Directive has extensive experience managing international programs carefully tailored to localized goals, dialects, regulations, and more

Ongoing Support: Reporting

Reports on all types will always be focused on ‘The Why’ behind each recommended action item. You will know how we are trending towards your business objectives and how the tactics of our strategy are working.

[Sample Project Presentation]



NSM (North Star Metric) Review

NSM Targets

Objectives	Quarterly Target	Progress Bar	Percentage (%)	Q1
140 SQLs	140		14.29%	20

- The Total Cost Per SQL over the last 30 days was $1,350:

Google

Performance

Over the past 14 days, conversions are up 134% due to the brand campaign and the telehealth campaigns picking back up:

47 Previous Period → 63 (+134.04%) → 110 Current Period

POSITIVE TOP MOVERS:

Branded (adgroup) 18 +Infinity %

telehealth companies (Keyword) + Search partners (network) 17 +425 %

Search - Features - Telehealth - Telehealth Landing Page (campaign) 14 +350 %

We’d like to continue to work on quality scores on the following campaigns since they are spending much more and still have low quality scores. The biggest issue is the landing page experience:

Enterprise Support:

Team Structure & Approval Process

Tactic/Strategy	Tier 1 SEO Team	Tier 2 Developers (Incl Yext)	Tier 2 Content/Product Teams	Tier 3 Designers	Tier 4 External/Partners	Tier 4 Legal	Tier 5 Corporate

Example of Content Update Notes

This content makes changes to:	
Add New On-Page Content	✓
Edit Current On-Page Content	❑
Pulled New Internal Linking Opportunities	✓
Edited Meta Title, Meta Description, and H1 Heading	❑

New On-Page Content:
- Added section on "Gap Insurance"
  - Added one sentence in graph 2 to add new keyword (gap insurance quotes)
    - Why? - We want to grow this keyword, the exact terminology is up to you, we just want to see this keyword reflected.

Pricing for

Design

Total Price Per Month: **$5k - $30k**

Pick & Choose | Price is determined by your choice of the following:

☐ Package 1

- Dedicated Designer + AD
- Up to 3 landing pages per quarter
- Up to 3 A/B tests per quarter
- Up to 6 image or simple GIF ad sets per quarter
- Monthly reporting
- Quarterly business reporting

☑ Package 2

- 2 Dedicated Designers + AD
- Up to 6 landing pages per quarter
- Up to 12 image/simple GIF ad sets per quarter (15 sizes per set)
- Up to 3 CRO A/B Tests per Quarter
- Weekly Meetings
- Monthly Reporting
- Quarterly business reporting

Price: $12k per month

☐ Package 3

- 2 Dedicated Designers + AD
- Custom quantity of landing pages
- Custom quantity of A/B tests
- Custom quantity of image ads
- Weekly Meetings
- Bi-Weekly Reporting
- Quarterly business Reporting

Pricing for

Design

Base Consulting Fee: **$12,000 per month**

Design Onboarding (Month 1)	
Deliverable	Fee
Design Onboarding	$12,000
Total	$12,000

Continued Success (Month 1- 12)	
Deliverable	Fee
Design Ongoing	$12,000
Total	$12,000

Price: $12k per month

Package 2

- 1 Dedicated Designer Consultant + AD
- CRO Testing & Consulting
  - Up to 15 Creative Ad CRO tests per quarter
  - Up to 15 Landing Page CRO tests per quarter
  - Native Web Page Audit for CRO optimization & brand alignment
  - Figma Mock-ups based on testing analysis
- Weekly Consulting Meetings
- Monthly Reporting
- Quarterly Business Reviews

Proposed Management Fee

Based on the deliverables mentioned in the previous slides, we are proposing the following management fee.

Paid Media	Performance Design
$36k	$12k
/month	/month

RevOps Audit
$5k

Thank You

We believe there is great opportunity at

And we'd love to be the ones to get you there

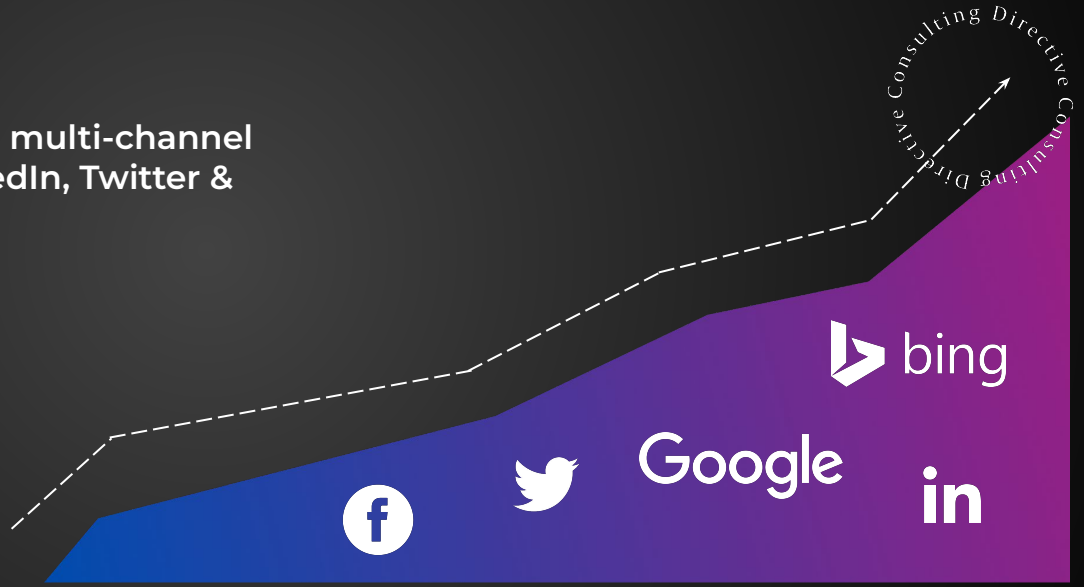
Customer-Led Success

SentinelOne™

We smashed their leads NSM with a multi-channel approach across Google, Bing, LinkedIn, Twitter & Facebook.

251%

Increase in qualified leads using a Customer-Led paid & organic search strategy



It Works.

When we can trust the data in front of us, it isn't Directive showcasing the value but rather just the numbers speaking for themselves. Growing in this manner is how we will secure more growth, revenue, and budget together.

PELICAN

REQUEST QUOTE

Radical Redesign of Landing Page Increases Leads by 294%

When reviewing Pelican's original page, we speculated that their users were getting too overwhelmed by the multiple navigation tabs and sheer amount of information on the page to convert. We streamlined the page to only contain the most relevant information that a user would need to know before converting.

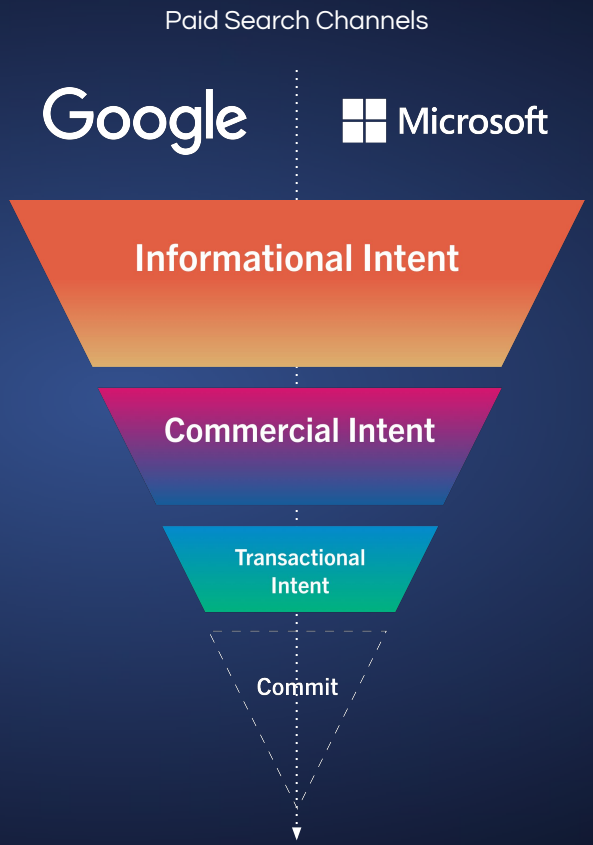
Customer-Led

Paid Search

When your customers search for solutions with intent to buy, they find you.

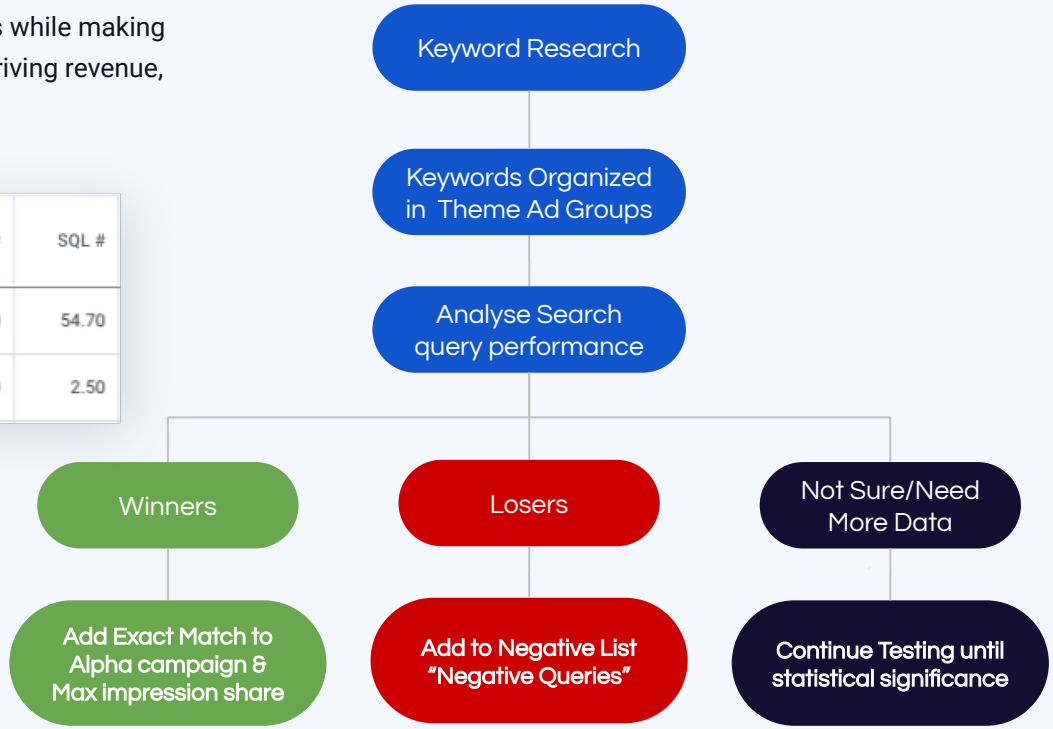
Our award-winning search campaigns start with deep customer research and segmentation. We execute and test a range of search tactics including Alpha Beta, Smart Broad, and Competitor campaigns - analyzing the data to ensure bidding and budgeting is driven by your NSMs.



Alpha/Beta Setup

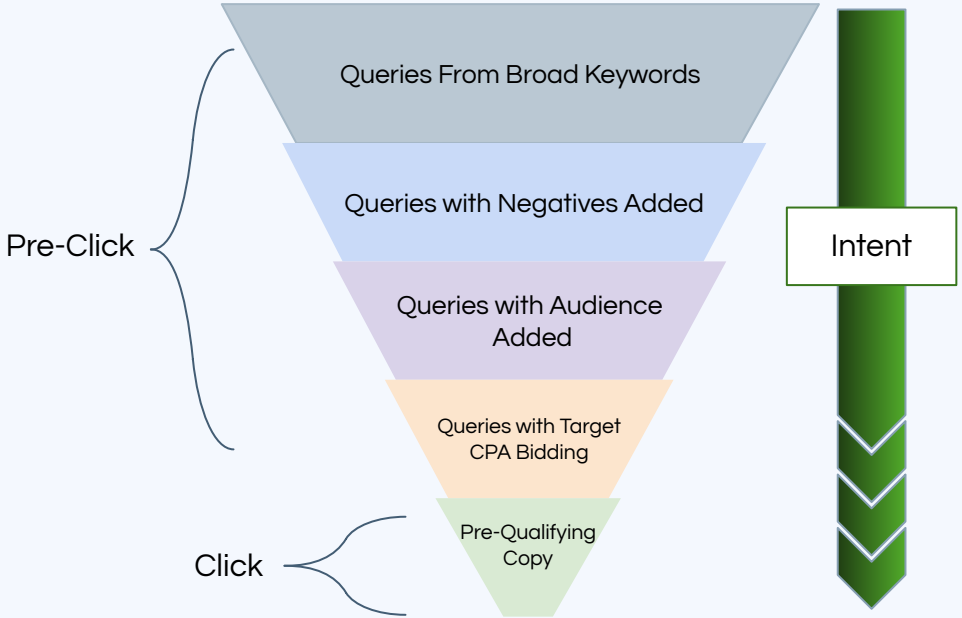
A crucial foundation of our setup also revolves around an alpha/beta setup. This allows us to continually test new queries and opportunities while making sure that our budgets are still focused on the queries that are driving revenue, and we're not losing impression share there.

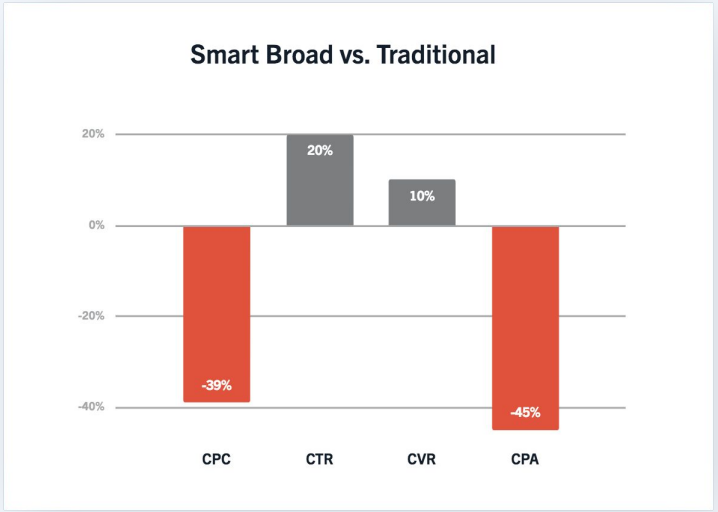
Campaign	↓ Cost	Demo #s	MQL #	SQL #
Alpha - Google |	$18,487.07	156.03	93.30	54.70
Beta - Google |	$9,246.53	36.60	11.50	2.50



Smart Broad Campaigns

Historically, broad keywords can lead to our ads showing for irrelevant search terms. However, because of the evolution of Google's audience targeting and smart bidding settings, we can harness the power of broad keywords like never before.





Customer-Led

Paid Social

Engage and convert your customers on every social media platform that matters to them.

We execute sophisticated social media campaigns, optimized for budget and conversions. This includes LinkedIn Conversation Ads, Facebook & Clearbit integrations, gift card & incentive campaigns and more.

Channels

Customer Segmentation Audit

By understanding our customer segments by use case, we will create content that resonates with their “jobs to be done”, not generic keywords.

	Creative		SEO		Paid Media	
	Demand Gen: Shared	Creative & Design	Demand Gen: Shared	SEO & Content	Demand Gen: Shared	Paid Media, Advertising, PPC & Growth
JTBD	Increase marketing's contribution to revenue	Own, elevate, and communicate their brand's visual identity through creative & design	Increase marketing's contribution to revenue	Increase marketing's contribution to revenue via SEO & content marketing campaigns	Increase marketing's contribution to revenue	Increase marketing's contribution to revenue via Paid Media channels
Customer Needs	Qualfied leads that turn into revenue	Design collateral that elevates & visually communicates their brand identity	Qualfied leads that turn into revenue via organic channels & content	Organic discoverability that leads to qualified leads. Content that educates target customers, resulting in demand and desire for their SaaS solution.	Qualfied leads that turn into revenue via paid media channels & advertising	More qualified leads via paid media channels while improving CAC
Challenges/Pain Points	Current design assets are not attracting ideal customers & are not converting into qualified leads. Not enough bandwidth to create high-quality, brand-aligned, and high-converting marketing collateral.	Not enough bandwidth to create high-quality, brand-aligned design collateral for their organization.	Lack of organic discoverability for relevant queries in regards to customer needs. Unsatisfactory amount of qualified leads coming through organic channels.	Not enough insights on what's working/what's not for SEO within the SaaS industry. Not enough strategic guidance to execute effective SEO campaigns that generate qualified leads.	Current solution, in-house or agency, is not driving enough qualified leads from paid media at a CAC that makes financial sense.	Not enough insights on what's working/what's not for paid media strategies within the SaaS industry. Lack of strategic guidance, expertise, industry knowledge, or bandwidth to execute & manage multi-channel paid campaigns. Unsatisfactory lead gen volume or ROI from paid media channels.

Customer-Led

Review Sites & Directories

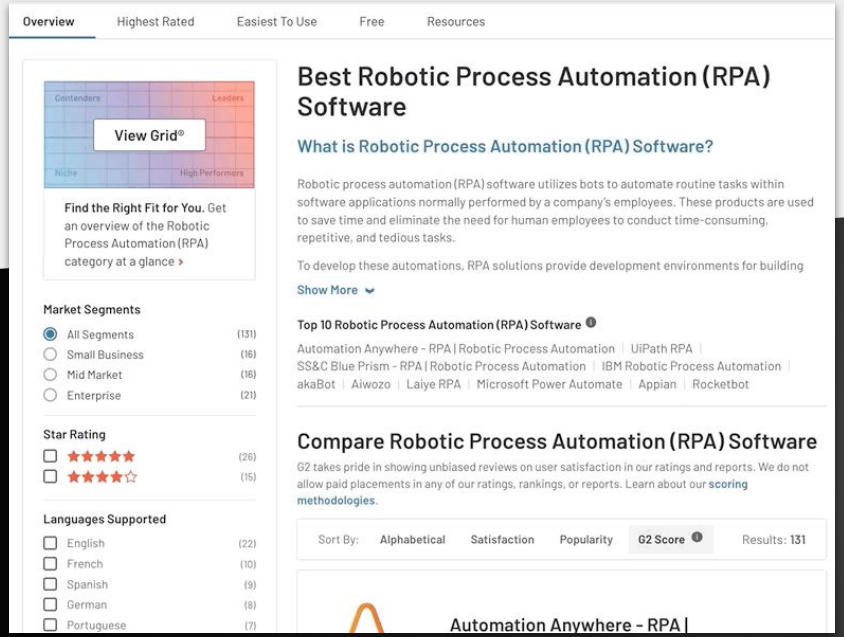
Be discoverable on the sites where your customers self-educate and compare solutions.

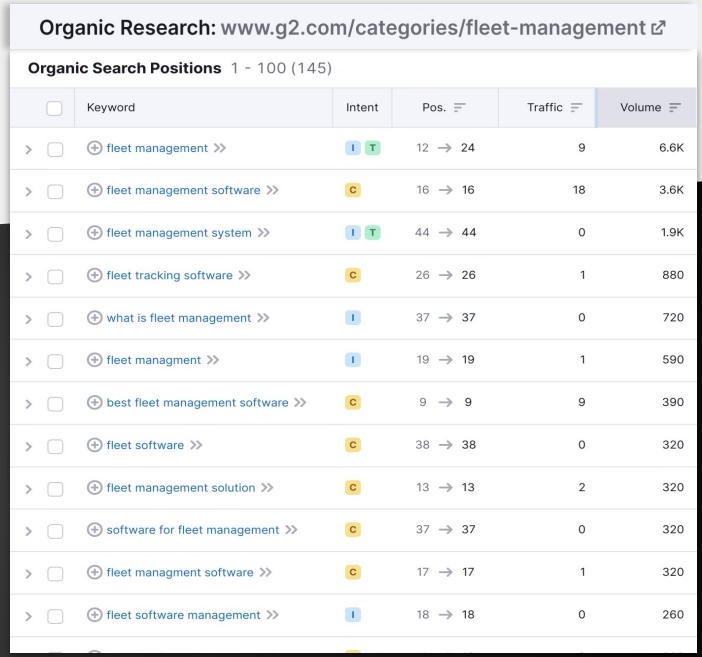
To own your category on the review sites that matter most, we optimize your profile and analyze reviews to understand customer needs and competitive positioning. Bidding and placement tests help to maximize budget and conversions.

Identifying Untapped Research Pools

Expanding Google Ads Strategy

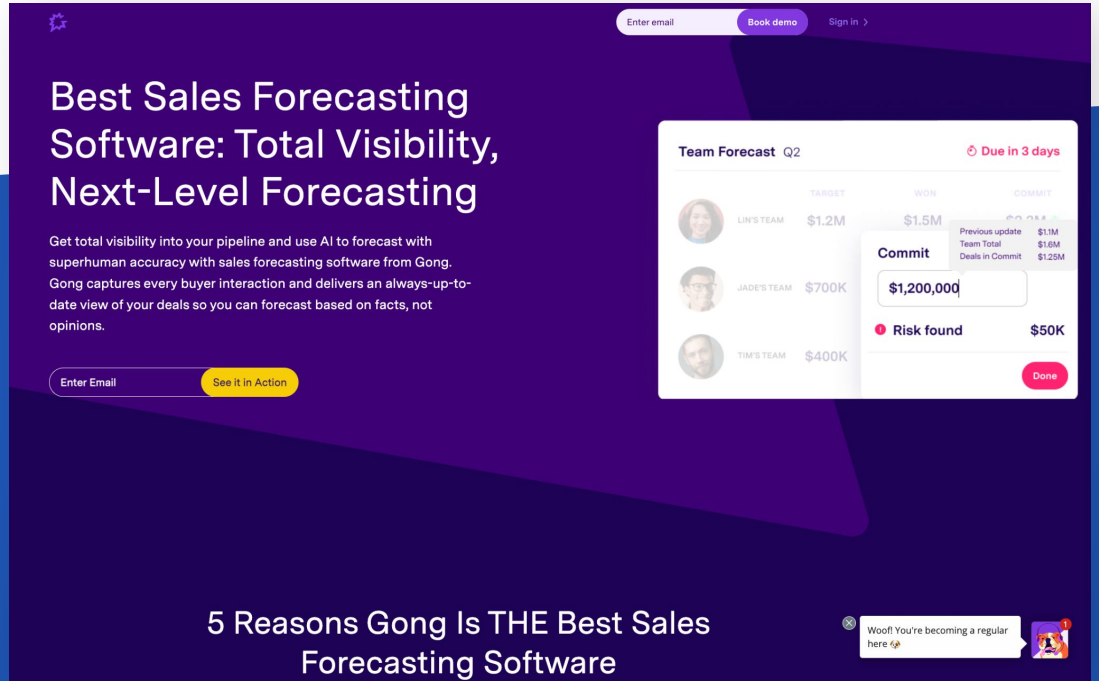
We see directory investments as a part of our SEM strategy. These placements generate most of their traffic from organic rankings, meaning we can increase our search engine market share by both investing in directories and mirroring positioning with Google and Microsoft Ads.



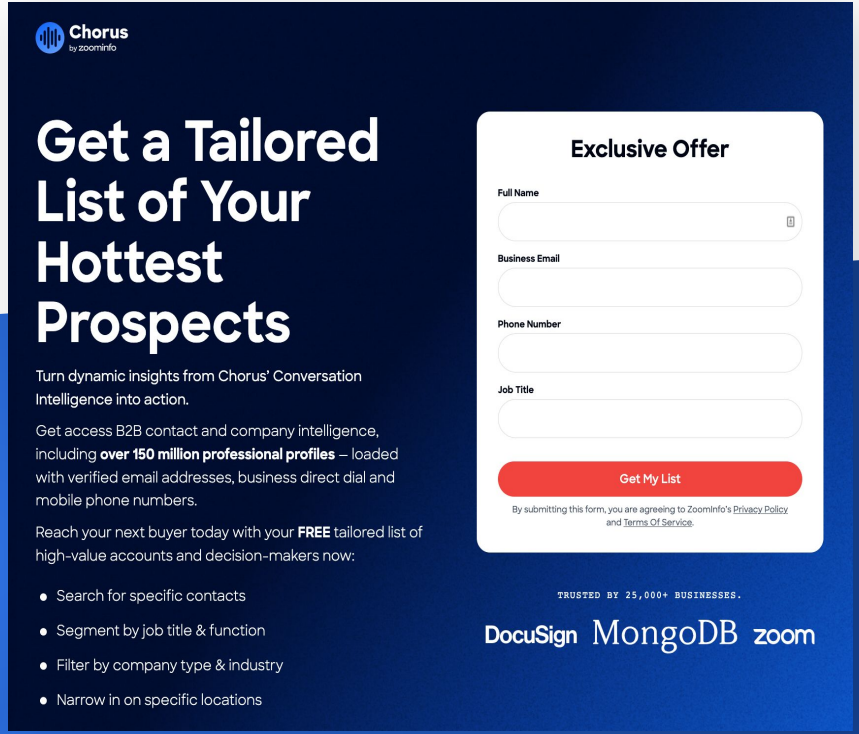


Directory Landing Page Experience

Landing page testing is one of the most powerful areas of performance optimization. Within platforms like Google and directories, what is said, shown, and offered on a landing page could be the difference between you getting your next customer or the competition getting them.

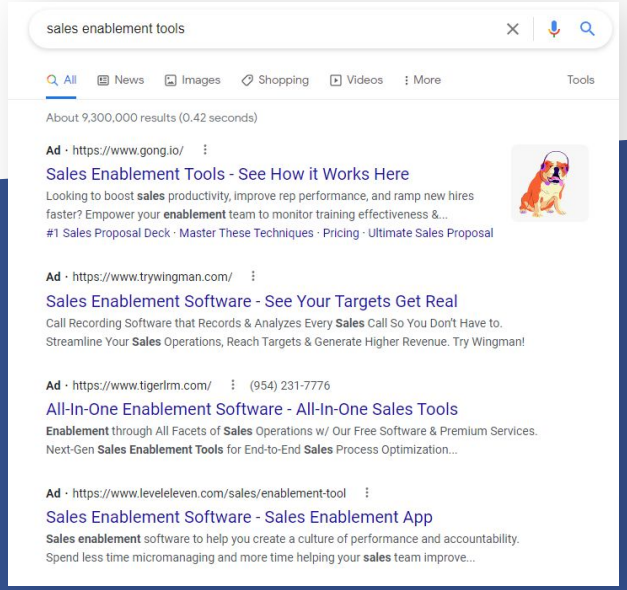


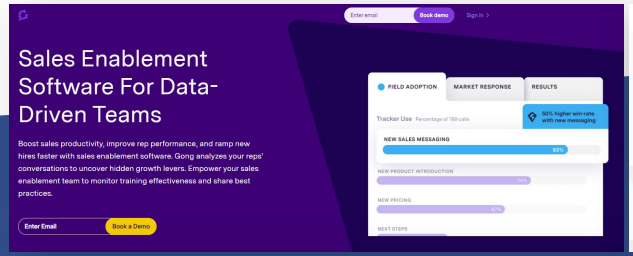
Directory Landing Page Experience

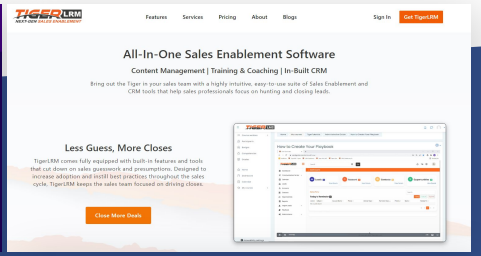


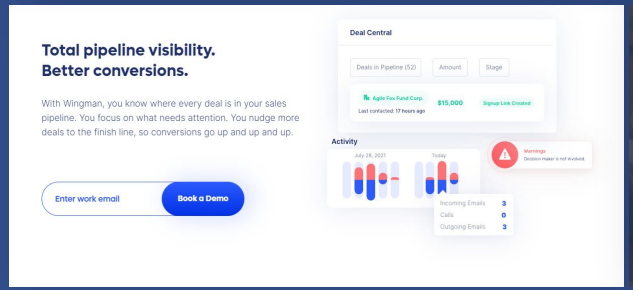
Stand Out by Showcasing Value

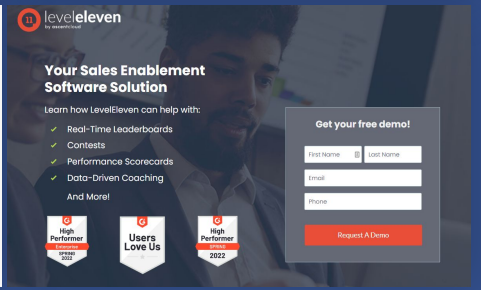
We need to move past the ‘all-in-one’ and ‘see how’ language that is so commonplace in your space. This change needs to be reflected not only on Google but on your actual landing pages as well. Show why Gong is the best solution. ***Excite at every opportunity.***











Performance Creative

Customer-Led Performance Creative powers your Paid Media ads to drive SQLs and sales actions.

We design emotive creative to best engage your customers, boosting brand affinity, SQLs and customer acquisition.

Research & Analysis

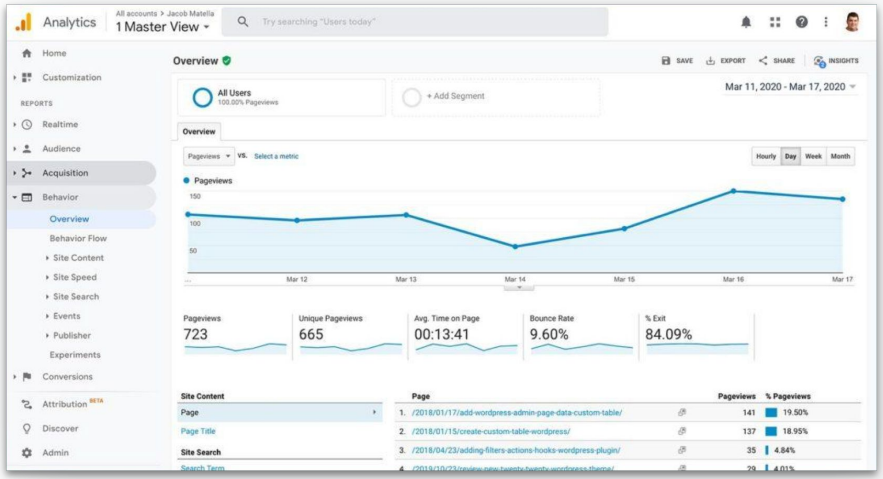
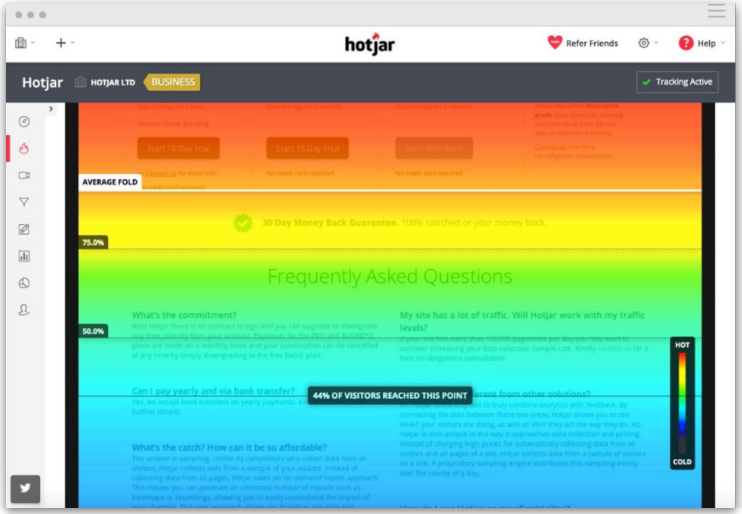
Data Analysis

Our team's goal is to continue to find areas of opportunities for optimization based on qualitative and quantitative research. Conducting different forms of analysis allows us to identify what core user behaviors and tests we should implement every quarter. In order to determine areas of the site to focus on, we leverage both traffic data as well as user behavior data across the site.





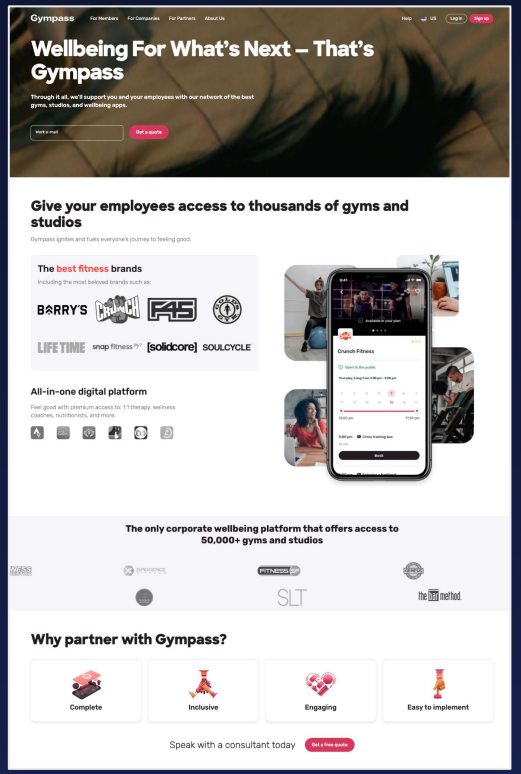
LANDING PAGE EXAMPLE

Testing best practices: Gathering insights to identify opportunity

Once users have landed on the page, we want to show them how Gympass can further the wellbeing of companies employees.

The initial creative variant version chosen will focus on a shortened page layout and format to display Gympass' UVP.

Without consistent landing page testing, the only levers we'll be able to pull to improve performance is audience targeting and messaging.



Original Design

Customer-Led

ABM

Identify and convert your key target accounts with personalized marketing.

We use first party data to minimize wasted ad spend, and leverage tools like Clearbit X to enrich target accounts with your ideal customer contacts. This ensures brand impressions reach qualified prospects, with messaging aligned with their wants and needs.
