Quarterly Business Review

MONTH 202X

CLIENT LOGO

We believe that the key to creating exponential business value today depends on a **renewed focus on the customer.**

BELIEF SYSTEM

Customer Generation

Delivering on the promise that Demand Generation forgot about.

More than a Category, this is our belief system that powers both Directive and client success.

METHODOLOGY

Customer-Led Solutions

Placing the customer at the heart of brand strategy and campaigns.

Customer-Led is our unique methodology and marketing solutions designed for Customer Generation.

Customer-Led Solutions

We built our entire agency around the exact pain points and opportunities you deal with daily.

Campaigns that engage your customers, where they are, with the offer they need

Customer-Led SEO that drives more SQLs from your ideal customer segments

Full-suite strategy offering for Customer Generation

Robust tech stack and conversion optimization focused on LTV:CAC

Flexible, powerful creative for every channel, personalized to each customer

End-to-end marketing optimization -- from planning & budgeting to execution & analysis

Directive

Customer-Led Video

Videos and motion graphics that engage your customers, and influence brand mindshare and purchase decisions.

We develop intentional video content that is visually captivating AND strategically resonates with your target audience. With Customer-Led video, hold the attention of your audience, articulate value quickly, and motivate action.

Directive

The QBR is a critical moment in our client relationship, and our opportunity to...

- Circle back and review our NSM and goal setting together
- Showcase what we achieved
- What we did not and what we learned - and use this as our opportunity to pivot to…
- New strategy, tactics and growth plan

Our core objective is to showcase the strength of our industry and client expertise, offer solutions, and drive continued investment in Paid Media and our other products.

It's important NOT to think of this as just "a summary of what we did every week" - the client already receives the weekly report - those tactical historical actions and insights can be placed in the appendix for reference.

Q2 Executive Summary

-54%

Decrease in cost-per-opportunity

641

MQLs

+244%

Increase in Lead > Opportunity CVR

Our goals for the quarter were set at 375 MQLs and $1 for $1 pipeline revenue for Life Sciences. Over the quarter, we obtained almost 2x the volume of MQLs, and brought in $291k in revenue for 25 sourced S1 opportunities, according to the Tableau report. While our cost-per-lead when averaged for the quarter saw an increase as we tested different content pieces and audiences, our cost per opportunity decreased by more than half - from $36,400 to $16,568.
2Q21 was your best performing quarter to date in terms of lead>opportunity conversion rate at 1.48%.

Directive

Supporting Data

NSM Forecasting

If our ads were to perform with identical conversion rates as last quarter, our metrics would be projected as those in the green columns. We are set up for success to reach our goals with NAM campaigns, but will need to put additional growth efforts into all three verticals for EMEA in order to get closer to reaching your goals in the yellow column.

Based on historical conversion data, we must go into the quarter with the understanding that the projections are our realistic expectation for performance.

			*mql>tql rate			budget / hist. cpmql	projected tqls *(mql > tql rate)
	MQL Goal from Egnyte	**MQL > TQL rate**	**MQL > TQL goal**	**Budget**	**Historical CPMQL**	**projected MQLs**	**projected TQLs**
Life Science	575	7.78%	44.7	$131,577	$235.39	559	43

SEO/Paid Media

Strategy & Tactics

Directive

In this section, we highlight the tactics we will deploy on the channels we recommend to execute the strategy.

Depending on the recommendations, not all channels will be represented here.

Consider our Paid solutions across: Search, Social, Review/Directories, Programmatic, ABM, and Performance Creative AND our other product cross-sells: SEO, Video, Marketing Operations, CRO, and Strategy

There is one overview slide. Consider each tactic/channel receiving 3 slides for:

- Introduction slide
- Projected performance
- Targeting & bidding strategy
- Ad samples if possible

Strategy & Tactics Overview

#1

Tactic #1 Summary.

#2

Tactic #2 Summary.

#3

Tactic #3 Summary.

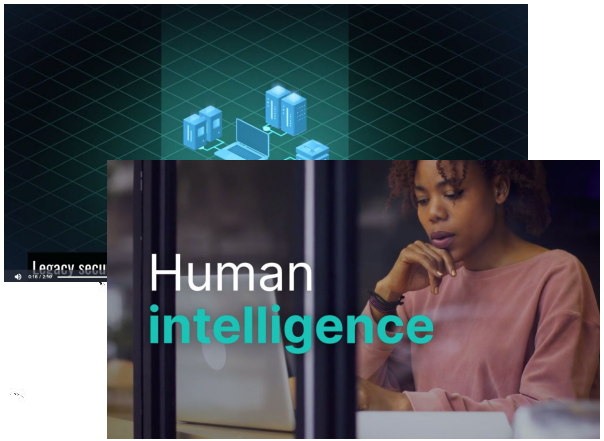

Directive

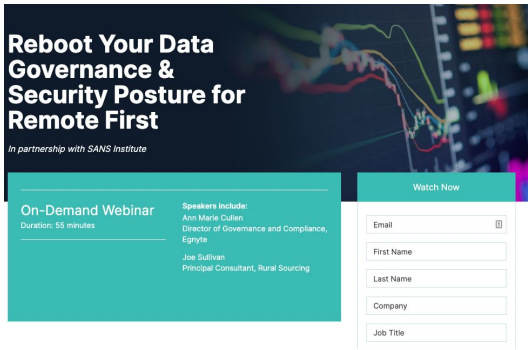

#1 Test Ungated Assets

Ungated Video > Gated LP

You have new video content in the Gov space, as well as potential new videos to launch for Life Sciences this quarter. We are going to test feed traffic ads that have typically lower CPCs to drive traffic to the SANS webinar pages.

Any contact information we get from the extra step of going to a landing page will show high intent for future convo ads, and any website traffic that we do not gain contact info from can be used as growth in our retargeting audience.

3

New TQLs

Directive

Projected Performance

	Historical	Projected	
Quarterly Spend	$25,000	$25,000	
Average CPC (GOV)	$13.10	$13.10	
Estimated Clicks	1,908	1,908	
Webinar LP CVR	2.80%	3.10%	
Estimated Leads	53	59	Projected TQLs
Cost per Lead	$468	$423	2.63

Branded video ads for lead gen in the MSP space historically brought in CPLs around $182 with native forms, though these videos were tied to meeting incentives. We do not have any historical data for Governance video performance, so our projections are being made from image ad performance in 2021.

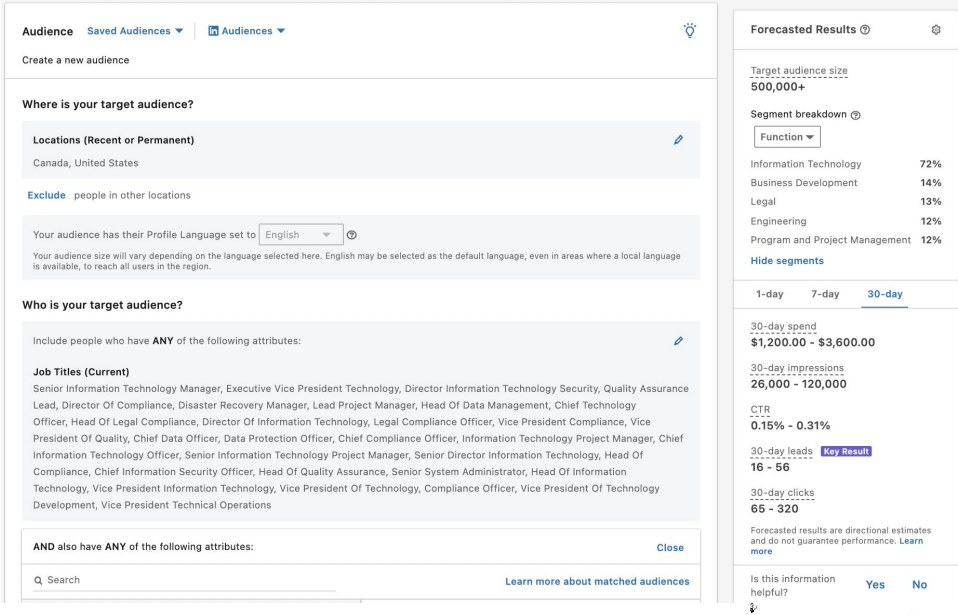

In Q2, we saw a 2.8% conversion rate of landing page forms for Webinars after leaving ads. If we can increase our conversion rate by 10%, it will bring our cost per lead down to $423. This could bring us 2-3 additional TQLs directly from the landing page form fills.

Targeting & Bidding Strategy

01

In order to get max visibility for our lowest CPC, we will target wide ICP audiences of IT Title targeting, which has our largest audience size of 550k.

We will also be adding all traffic from these landing pages as retargeting audiences for other content & conversation ads to bring users through the buyer journey, which could result in assisted conversions through other touchpoints.

#2 LinkedIn Conversation Ads

Conversation Ads - EMEA, Gov

Conversation ads have been impactful in Life Science, and are starting to make an impact in our recent Construction launch as well.

These conversation ads will be paired with High-Value-Offers in exchange for attended intro calls drives low cost, high intent engagement.

Conversation ads will be implemented to Governance space, as well as all verticals in EMEA as a retargeting tactic to drive more meetings.

6

New TQLs

Projected Performance

	Historical	Projected
Quarterly Spend	$112,752.79	$115,000
Average CPL (GOV)	$234.58	$164.21
Estimated Leads	481	700
Lead > MQL	67.91%	67.91%
Estimated MQLs	326	476
MQL > TQL	4.45%	4.45%
Estimated TQLs	15	21

	Historical	Projected
Quarterly Spend	$57,077.08	$25,000
Average CPL (EMEA)	$282.27	$197.59
Estimated Leads	202	127
Lead > MQL	40.79%	67.91%
Estimated MQLs	82	86

Conversation ads within the Life Science space saw CPLs averaging 30% less than download ads.

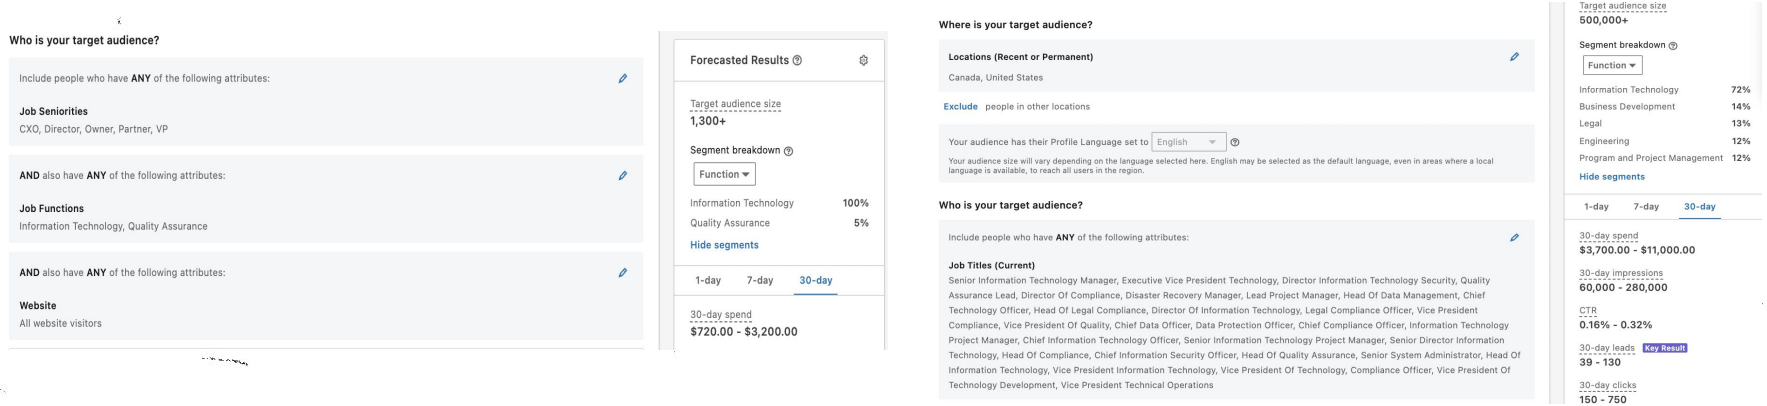

If similar a decline in cost per lead takes place in EMEA and Gov, we could expect 219 more leads that could translate to 6 additional TQLs for around the same spend allocations (21 total TQLs) for NAM, which is the only market we currently have predictive TQL data for.

Targeting & Bidding Strategy

02

Conversation ads - in most cases - see their lowest CPLs and most relevant messaging with retargeting audiences. We will use several segmented retargeting pools, like native form fills, site traffic, contacts, and account lists.

In some cases, like with Life Science, we wanted to increase our pool of eligible sends and targeted some the tighter ICP audiences, which also yielded positive results and could be tested in other verticals as well.

Tactic Overview

LinkedIn Carousel Ads - Blogs & Customer Stories

I will be testing single-image website traffic ads against carousel ads for customer stories with multiple images and copy versions.

We also could have the opportunity to run carousel ads that link to multiple customer stories, giving a viewer in the awareness stage more opportunities to find something that interests them. We can roll this tactic out for ongoing awareness campaigns within each vertical to increase lower cost website traffic and ad engagement audiences.

While this tactic is geared towards bringing awareness into the funnel, it will have longer term effects on our retargeting audiences that are converting very well through convo ads and downloads.

2

Assisted TQLs

Projected Performance

	Blog Content	Potential post-click	RT Convo	Potential RT
Quarterly Spend	$3,484.78	$10,000.00	$417	$1,500.00
Average CPC / CPL	$12.82	$12.00	$0.54	$0.54
Estimated Clicks	272	833	772	2,778
Click > Lead CVR	1.70%	1.00%	0.64%	0.64%
Estimated Leads	5	8	5	18
Cost per Lead	$754.12	$1,200.00	$84	$84.38

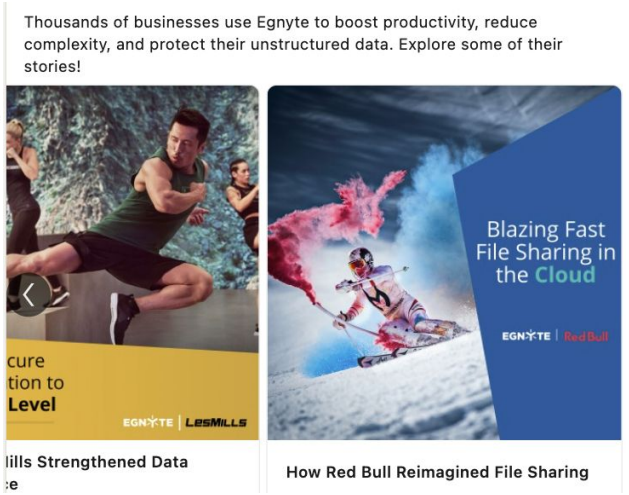

Convo ads with retargeting audiences are averaging $93 per lead. By increasing our spend allocation to bring traffic to the site, our retargeting pool will increase at a lower cost than through lead gen forms.

With web traffic CPCs averaging $13, we can expect 750+ visitors to the customer stories with 10k quarterly spend allocation.

Assuming our click > conversion rates perform even 1/2 as well as other non-download ads, we could expect around 8 leads directly from post-click actions, and will help expand our retargeting pool to have greater spend for bringing in additional a total around 26 high-intent leads, or around 1-2 TQLs.

Budget Analysis

Directive

In this section, we review our our budget allocation from the previous quarter and analyze efficiency and share insights.

We then share our proposed budget, aligned with our updated NSMs and strategy recommendations.

Budget Analysis

			*mql>tql rate			budget / hist. cpmql	projected tqls *(mql > tql rate)	mql goal * hist cpmql
	MQL Goal from Egnyte	**MQL > TQL rate**	**MQL > TQL goal**	**Budget**	**Historical CPMQL**	**projected MQLs**	**projected TQLs**	**Budget needed to hit egnyte MQL goal**
Life Science	575	7.78%	44.7	$131,577	$235.39	559	43	$135,346.94
LS EMEA	199	1.69%	3.4	$17,598	$89.17	197	3	$17,745.20
Cons	109	20.00%	21.8	$100,063	$804.73	124	25	$87,715.84
Cons EMEA	38	33.33%	12.7	$13,383	$2,911.94	5	2	$110,653.59
Gov	308	4.45%	13.7	$205,768	$275.90	746	33	$84,978.14
Gov EMEA	107	0.00%	0.0	$27,521	$401.42	69	0	$42,951.82

Based on historical cost per MQLs in each vertical, we are on pace to achieve most MQL goals - even if no metrics improved. Because EMEA is not converting to pipeline as well, these budgets may be better spent on NAM campaigns to ensure we hit our revenue targets.

Directive

Proposed Budget

			*mql>tql rate			budget / hist. cpmql	projected tqls *(mql > tql rate)	mql goal * hist cpmql
	MQL Goal from Egnyte	**MQL > TQL rate**	**MQL > TQL goal**	**Budget**	**Historical CPMQL**	**projected MQLs**	**projected TQLs**	**Budget needed to hit egnyte MQL goal**
Life Science	575	7.78%	44.7	$131,577	$235.39	559	43	$135,346.94
LS EMEA	199	1.69%	3.4	$17,598	$89.17	197	3	$17,745.20
Cons	109	20.00%	21.8	$100,063	$804.73	124	25	$87,715.84
Cons EMEA	38	33.33%	12.7	$13,383	$2,911.94	5	2	$110,653.59
Gov	308	4.45%	13.7	$205,768	$275.90	746	33	$84,978.14
Gov EMEA	107	0.00%	0.0	$27,521	$401.42	69	0	$42,951.82

While it is great to have vertical specific goals, we also want to ensure we are putting our spend where we see the most valuable cost-per-MQL, and best MQL > TQL conversion rates. If your total goal is 1336 MQLs, we should allocate our spend as such to focus on the qualified leads that are converting to pipeline. If we shift our spend to focus on pipeline generators (while leaving some exposure in EMEA), we can achieve an additional 6 extra TQLs for the same cost.

Directive

New Quarterly Roadmap

Directive Consulting Directive Consulting

Directive

In this section, we present our growth roadmaps of key milestones and deliverables over the next 90 days - and then a zoom out to our 12-month growth roadmap.

This will instill a sense of direction and certainty, and prime their team to consider long-term strategic planning and budgeting. This sets up our future meetings and QBRs for success, to review strategy, pivot as needed, and allocate budget for the campaigns ahead.

Next Steps

Optimizing towards MQLs & TQLs

By shifting our funds towards our pipeline generating verticals and assets, we can improve our cost per pipeline and increase our volume of TQLs.

Conversation Ads

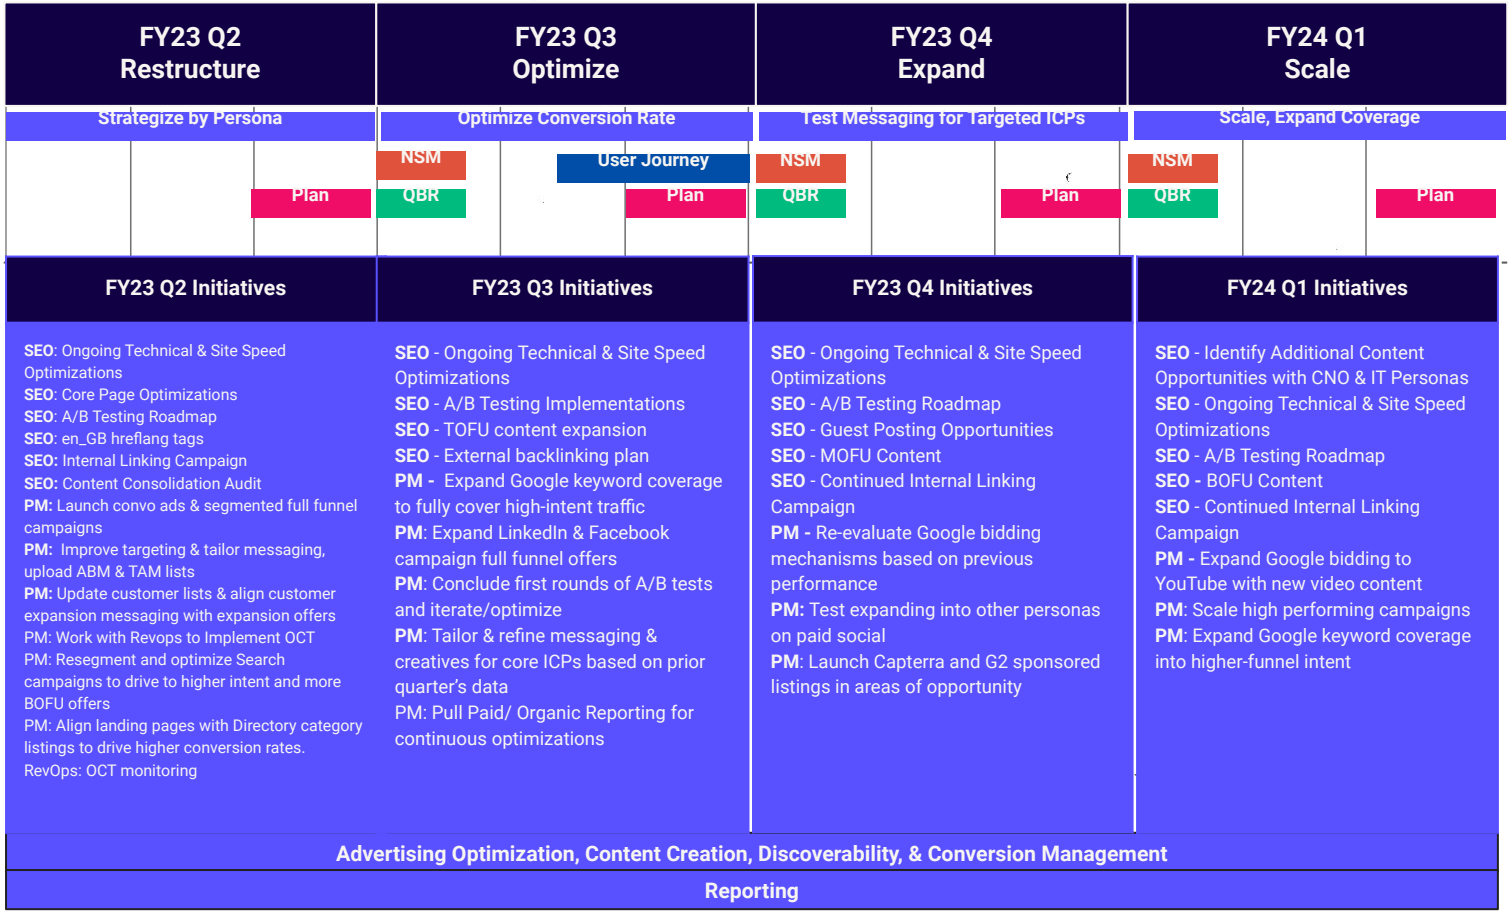

We will roll out conversation ads to Gov and all EMEA campaigns to increase the volume of high-intent demo requests, which should also improve our lead > MQL/TQL rates.

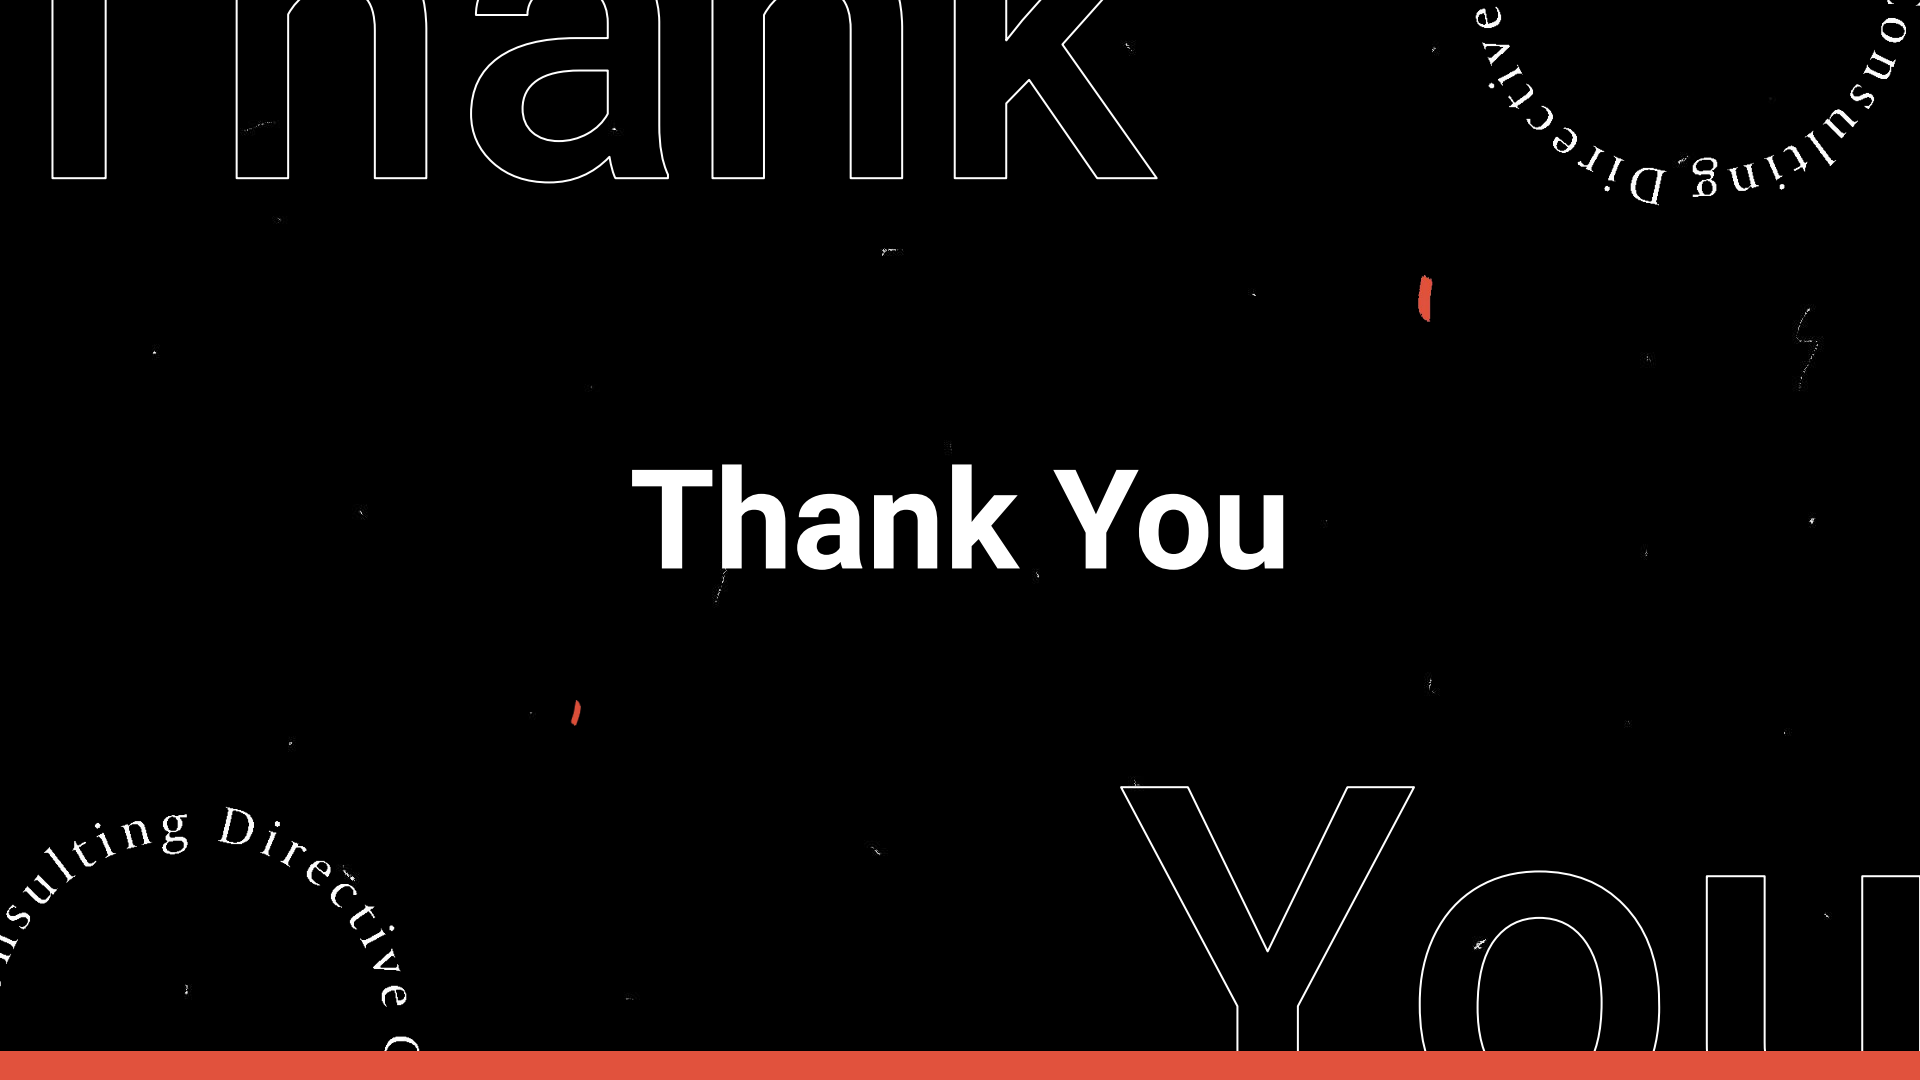

Traffic Format Testing

We will be testing the formats of our awareness campaigns to aim for lowest cost traffic to site that can convert through ongoing touchpoints. We will be testing the launch of ungated videos to gated LPs, and ungated blogs in carousel formats

Directive

12-Month Growth Roadmap

Thank You

The appendix is not a throw away section of skipped slides. It is a focused space in the presentation where every slide has a single data point or chart, or links to relevant work we have completed.

While we don't typically present the appendix it is a place to save a snapshot of analytics or summarize the work we did, such as deeper insights by channel.

This reiterates the value we delivered, reminds them of the work we presented each week, and shared the insights we uncovered.

Channel Breakdown

Directive

Channel Breakdown - Facebook LS

What We Saw

We saw a major increase in our volume of leads this quarter from Facebook while we tested new campaigns with Metadata and ClearbitX. Our click to conversion rate saw a decrease initially with the test of new audiences, but improved towards the end of the quarter as we made optimizations. Due to our tight ICP, Facebook is not our most viable channel for bringing leads through to pipeline, so we have decided to not use this channel moving forward.

Totals	Q1 2021	Q2 2021	% Change
Spend	$11,070.87	$89,347.70	**707%**
Clicks	759	15,094	**1888%**
Leads	60	330	**450%**
Conv. Rate	7.9%	2.2%	**-72%**
Cost/Conv	$184	$270.75	**47%**

Channel Breakdown - LinkedIn LS

What We Saw

We have seen improvement in our conversion rates QoQ, as well as YoY on LinkedIn. While our cost per lead saw a slight increase since Q1, it has a very healthy improvement compared to last year. LinkedIn continues to be the leading performer in driving revenue and lead volume, and will continue to be where we optimize our efforts most heavily for Life Science.

Totals	Q1 2021	Q2 2021	% Change	Q2 2020	Q2 2021	% Change
Spend	$104,251.75	$124,452.52	**19%**	$50,000	$124,452.52	**148%**
Clicks	17,938	14,029	**-21%**	5,236	14,029	**168%**
Leads	637	754	**18%**	220	754	**243%**
Conv. Rate	3.55%	5.37%	**51%**	4.20%	5.37%	**28%**
Cost/Conv	$163.66	$165.06	**.85%**	$227.27	$165.06	**-27%**

Directive

Channel Breakdown - Facebook C&E

What We Saw

Facebook saw a decline in performance across the board for C&E this quarter. This will be a focus of our optimization efforts moving into Q3 to run additional experiments within Metadata and expand our reach with gated assets based on what is performing well in LinkedIn.

Totals	Q1 2021	Q2 2021	% Change
Spend	$7103.66	$4019.70	**-43%**
Clicks	441	309	**-29%**
Leads	29	7	**-75%**
Conv. Rate	6.57%	2.26%	**-65%**
Cost/Conv	$244.95	$574.24	**+135%**

Channel Breakdown - LinkedIn C&E

What We Saw

We took over C&E efforts at the start of June, so I have provided MoM data for comparison as well since quarterly wins and losses are from mixed efforts. Since takeover, we improved our conversion rates by 179% and brought down our cost per lead 64%.

Totals	Q1 2021	Q2 2021	% Change	May 2021	June 2021	% Change
Spend	$24,460.16	$31,581.21	**29%**	$19,378.66	$6,561.73	**66%**
Clicks	1731	1505	**13%**	898	69	**168%**
Leads	48	50	**4%**	19	16	**-15%**
Conv. Rate	2.77%	3.32%	**20%**	2.11%	5.90%	**179%**
Cost/Conv	$509.59	$623.61	**+22%**	$1019.93	$365.06	**-64%**

Directive

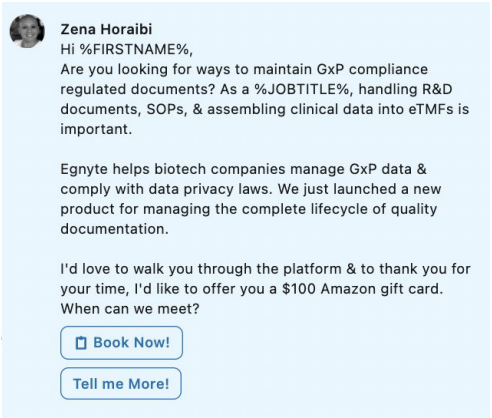

Successful Paid Media Tactic: Convo / Inmail Ads

What We Saw

This tactic has been huge for us to drive demo requests, which can be expensive on LinkedIn. This resulted in 39 LS meeting requests at a cost of $116.29 per lead, with our most favorable audiences between $60-80 per lead.

Our most favorable audiences over the quarter in Convo ads came from Retargeting at $61, industry + cloud security software at $70, and Groups - Regulatory at $89. We also tested the use of $50 vs $100 GCs over the quarter, and saw a 17% improvement in our cost-per-lead (from $117 to $96)

Campaign Name	Spent	Impressions	Clicks	Average CPC	Average CTR	Conversions	Cost Per Conversion	Leads	Cost Per Lead
9 filtered of 114 campaigns	$3,255.98	7,746	5,418	$0.60	69.95%	0	-	28	$116.29

Directive

Successful Tactic: LinkedIn Group Targeting

What We Saw

By targeting groups surrounding various compliance interests with layered industry requirements, we were able to target users that had already indicated interest in regulatory technology. Excluding retargeting audiences, our group targeting saw average CPLs of $312.97, whereas non-group targeting saw CPLs at $563.35 (80% improvement)

Campaign Name		Spent	Impressions	Clicks	Average CPC	Average CTR	Conversions	Cost Per Conversion	Leads	Cost Per Lead

Unsuccessful Tactic: Lookalike Audiences - LS

What We Saw

We tested a few lookalike audiences on Facebook (forms, traffic, contacts), and saw a drastic increase in number of leads, but the leads that came through were of poor quality for Life Science due to a tighter ICP. While this tactic was unsuccessful for Life Science, it will likely be beneficial for content downloads in the GOV / Horizontal space where the ICP is wider.

	Ad Set Name	Delivery ↑	Attr Set	Results	Reach	Frequency	Cost per Result
	ICP	Campaign Off	7...	1 On-Facebook Lead	3,182	3.04	$723.87 Per On-Facebook L...
	ICP - Director+	Campaign Off	7...	– On-Facebook Lead	1,238	3.45	– Per On-Facebook L...
	Clearbit - NAICS	Off	7...	– On-Facebook Lead	–	–	– Per On-Facebook L...
	Clearbit - Wide ICP	Off	7...	– On-Facebook Lead	19	1.63	– Per On-Facebook L...
	Lookalikes - Forms	Off	7...	117 On-Facebook Leads	18,552	2.63	$33.96 Per On-Facebook L...
	Lookalikes - Customer List	Off	7...	5 On-Facebook Leads	17,404	1.44	$347.97 Per On-Facebook L...
