DISCOVERY

The market

01 · ASSESSMENT

Where COMPLY sits — plain truth

What we are

A workspace for people who **live in construction draw packages** every month — pay apps, waivers, plan & cost, bank-ready trail.

Pilot on **comply.capital** at about **$300 / project / month**.

What we are not (yet)

Not the full bank loan OS on day one. Not a feature war with Built. Not an “AI age” pitch. Not a developer-billed platform copy of Rabbet.

Strengths to run at

- Real pain: monthly monitoring grind
- **CMAA** warm track already running — don’t rebuild it
- Room to scale with **cold / network / Apollo** sequences next
- Low trial bar vs enterprise bank software
- Consultant wedge bank-first vendors underserve
- Founders who can do live package walkthroughs

Gaps we must close

- Lock full price band with Tom/Jerod
- Get 1–5 live pilot proof stories
- Stay disciplined: consultants ~70% · developers ~20% · lenders third (not ideal outbound)
- Don’t get pulled into bank RFP theater early
- Write down time-saved / miss-reduced proof

Competitors

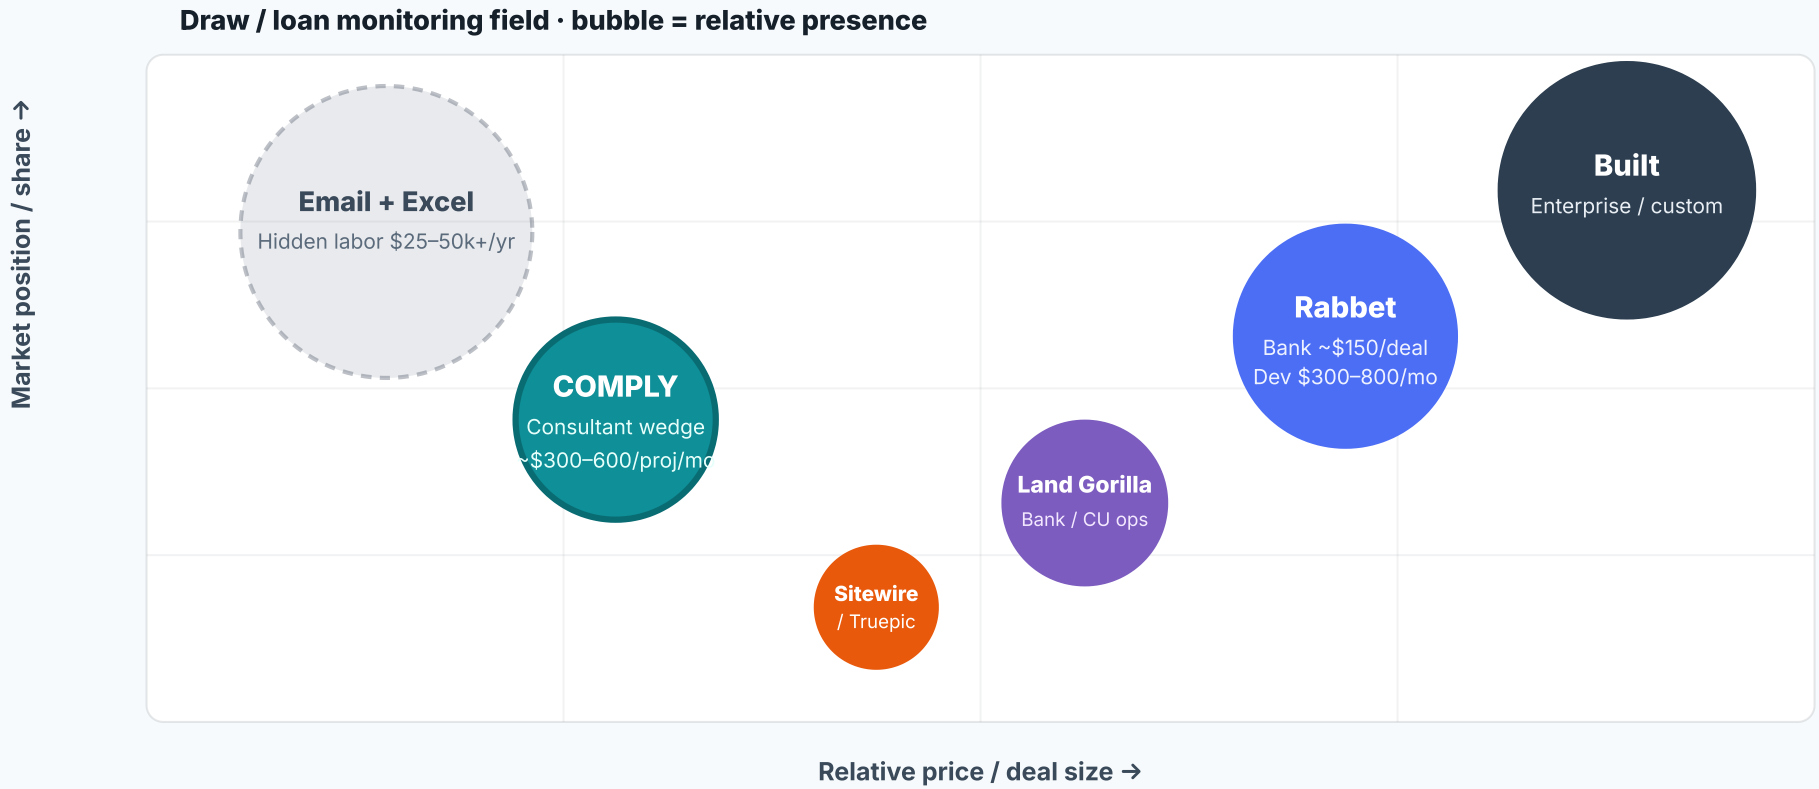

Who else is in the fight

Player	What they sell	Who pays	Threat to us
Rabbet	Lender draw / budget / docs	Bank cheap · developer heavy	Named in sales calls — know the answer
Built	Big construction-finance platform	Enterprise lenders	Logo gravity · long cycles
Land Gorilla	Construction loan manager	Banks / CUs	Bank ops software lane
Sitewire / Truepic	Inspection / photo proof	Per job / feature	Field piece only
Email + Excel	“Free” process	Hidden staff time ($25k–$50k+/yr stories)	**Real day-to-day rival**

Bank platforms already own the talk with the lender. Almost nobody owns the consultant’s monthly draw-review paperwork. That is where COMPLY starts.

02 · COMPETITOR MAP

Market share × price (circle view)

Read the chart

Up = more presence
Right = higher $ / enterprise
Size ≈ relative share

Their money model

Rabbet: bank cheap, developers heavy
Built: enterprise/custom
Excel: “free” + hidden labor

COMPLY stack-up

Consultant-first wedge
Pilot ~$300/project/mo

Full ~$300–$600
Grow share with proof

Directional owner map — not audited market-research %. Update when deal intel improves.

Their money model vs ours

Working owner numbers until a live sheet is pasted in:

RABBET

Hook the bank · bill the builder

- Lender ~**$150 per deal** — easy yes
- Get software on real loans
- Pull developers onto the system
- Developers carry ~**$300–$800 / deal / month**

Smart bank-first SaaS. Not our first door.

COMPLY

Hook the consultant · earn the bank

- Consultant trial ~**$300 / project / month**
- 1–2 live jobs · real packages
- Prove speed + fewer misses
- Lender follows because their reviewer already runs cleaner
- Developers only on the same loan path

> **Rabbet starts with the bank, and developers pay most of the bill. COMPLY starts with the construction consultant the bank already uses — then we show the bank it works.**

Tom / Jerod line when they say “Rabbet”

“They run the loan platform and put most of the bill on developers. We help the firm the bank already hired get through monthly draws faster — with fewer misses — starting on 1–2 live jobs at about $300 a project a month. You still make every call.”

03 · WHO WE SELL TO

Who we sell to

Three markets. Three people. **Marcus is primary (~70%).** Never blend his copy into Elena's list.

PRIMARY · 70%

THE MONTHLY MONITOR · CONSULTANT

Marcus Hale · 46

"My product isn't a PDF. It's a defensible recommendation to the bank — and I'm buried every month."

Role: Principal / senior reviewer at a lender's monitoring firm.
Day: Pay apps, G702/G703, waivers, site notes, bank memo.
Buy path: Walkthrough → 1–2 live pilots → expand

PAINS

- Package chaos + waiver chase
- No single checklist across jobs
- Hours gone before the recommendation

COMPLY WIN

- Same spine every draw
- Faster, cleaner trail
- $300/project trial on real work

SECONDARY · 20%

THE CREDIT DESK · LENDER

Elena Vargas · 41

"I don't need another platform tour. I need consistent draws across the book — and fewer surprises."

Role: VP / credit / construction lending lead.
Day: Approve funding, manage risk, rely on monitors.
Buy path: Joint pilot with her consultant — not cold RFP first

PAINS

- Uneven package quality
- Slow monitoring = risk
- Big software cycles elsewhere

COMPLY WIN

- Works with firm she hired
- Proof from live pilots
- Not $150/deal bank war first

SECONDARY · 10%

THE DRAW SUBMITTER · DEVELOPER

Jordan Park · 38

"Tell me what the bank needs so the draw funds the first time — I'm not trying to live in software."

Role: Developer / project principal submitting draws.
Day: Keep jobs funded; fight rework and delay.
Buy path: Only with a live bank/consultant path — not main wallet

PAINS

- Kicked packages
- Unclear monthly checklist
- Heavy software bills on his side

COMPLY WIN

- Clearer expectations
- Fewer kicks when Marcus runs COMPLY
- Not Rabbet's developer-pay model

Apollo ICP samples

Real people and firms from lists we already pulled — so Tom & Jerod can say “yes, those people” or “no, not them.”

03B · YES · PRIMARY

Construction consultants (Marcus)

Lender's construction consultants / monitoring firms — monthly draw review for banks. **Chase first (~70%).**

> **If they build or sell construction services — not monitor draws for a lender — out of primary.**

04 · NORTH STAR · 3% / $3M

Ultimate goal + this year

$3M
Yearly recurring revenue — ultimate goal

~100–125
Paying companies at plan math (5 projects × ~$400/mo)

1–5
Pilot firms by Dec 2026 — the only Q4 number that matters

> **This fall (late 2026) is not about making $3M. It is about getting real pilot customers on live jobs. Then in 2027: start with 1 paying client on Jan 1 and grow to 20 by Dec 31 (about $40,000 a month recurring, about $480,000 a year at our planning numbers).**

1 → 20
2027 goal — 1 paying client on Jan 1 → 20 by Dec 31

~$40k MRR
At 20 clients · ~$2k MRR each (5 projects × ~$400)

~$480k ARR

Yearly total · about 2 new paying clients each month

LinkedIn → **Newsletter** → **Social** → **Walkthrough** → **Pilot** → **Expand**

04 · REVENUE MATH

How many customers = $3M?

Companies × active projects × $/project/month × 12

Projects / company	@ $300	@ $400	@ $500
3	~278 cos	~208	~167
5	~167	**~125 ← plan**	~100
8	~104	~78	~63
10	~83	~63	~50

Planning anchor

~$400 / project / mo · 5 projects
= ~$2,000/mo · ~$24k/year each
$3M ÷ $24k ≈ 125 companies

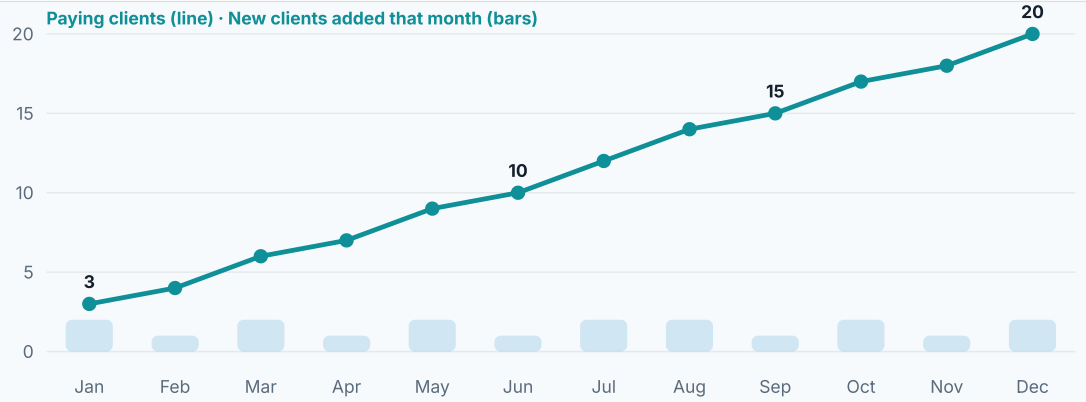

Price today

Pilot: $300 / project / mo (~60 days)
Full (confirm): ~$300–$600 / project / mo
Depending on mix: about 80–200 companies

04 · 2027 FORECAST

1 paid client on Jan 1 → 20 by year-end

If we get **1 paying client on Jan 1, 2027**, the goal is **20 paying clients by Dec 31, 2027**. That means **19 new paying clients in 12 months** — about **1.6 new clients every month**. We should aim for **about 2 new paying clients per month** so a slow month or a cancel does not wreck the year.

~$2k → $40k

Monthly recurring revenue
1 client ≈ $2,000 per month (5 projects × ~$400)
20 clients ≈ **$40,000 per month**

~$480k

Yearly revenue at 20 clients
20 × ~$24k/year = **about $480k per year**
Early pilots with fewer jobs will be lower until more projects are on COMPLY

~2 / mo

How many new clients we need each month
Need 19 new paying clients total · aim for about 2 signups per month
We need more demos than buyers, because not everyone says yes

Where the 20 come from

Primary: lender-side construction consultants — about **~50 ideal firms** in the core target set. Getting 20 clients means winning a big share of that small group first (Marcus).

Not the main buyer: commercial developers number in the **tens of thousands** — useful on a live bank/consultant path, not who we chase first to hit 20 clients in 2027.

Assumptions (label until price locks)

Plan math = 5 active projects × ~$400/project/mo = ~$2,000 MRR / ~$24k ARR per company.
Pilot start can be $300/project/mo on 1–2 jobs — MRR ramps as projects stack.
Churn/slip buffer = sell ~2 / month even though math is ~1.6.

04 · LADDER

Multi-year climb (owner view)

When	Target	What must be true	Rough $*
Q4 2026	**1–5 pilots**	CMAA (already on) + non-CMAA LinkedIn/email sequences + walkthroughs + live jobs	Pilot fees
End 2027	**20 paying** (from 1 on Jan 1)	About 2 new clients per month · consultants first (~50 good-fit firms)	**~$40k per month · ~$480k per year**
End 2028	~40–60 paying	Referrals · lender intros	~$1.0–1.5M
2029–30	~100–125 paying	Consultants + some lenders	**~$2.5–3.0M+**

*~$24k/company/year. Q4 floor=1 · solid=2–3 · stretch=4–5. Do not treat pilot customers like full $3M-scale customers.

05 · MESSAGE MAP

One spine · three accents

> **COMPLY helps you run construction draws as a system — cleaner packages, less chase, bank-ready trail.**

Marcus

Faster monthly monitoring without giving up judgment. Walkthrough → pilot.

Elena

Consistent bank-ready draws across the book. Joint pilot with your consultant.

Jordan

Draws through first time. Fewer kicks. Faster funding.

Voice rules

Peer. Plain. Short. Field words only: pay-app, draw, G702/G703, lien waiver, monitoring. **No AI hype. No feature dumps. No deck-first meetings.**

How every lead should move

1. Connect → 2. Short note → 3. Newsletter → 4. Social → 5. Walkthrough → 6. Pilot

Sources (priority order)

- **CMAA / conference** warm names — already in motion (keep going, don't rebuild sequences around it)
- Existing LinkedIn network — Tom + Jerod connect & post via **Reply.io**
- Apollo lookalikes of 34 Fit A firms
- Newsletter forwards + post comments

Ask ladder

- Accept / continue on LinkedIn
- Join monthly brief
- 20-min package walkthrough
- Pilot 1–2 live loans on comply.capital
- Expand projects after proof

Where we run the plan

Four channels. Same ICP. Same offer path: walkthrough → pilot → paid.

1 · LinkedIn	2 · Email	3 · Social	4 · SEO
Primary pipeline engine	Open + nurture + follow-up	Founder presence & proof	Always-on inbound compound

> **Tom & Jerod run LinkedIn + social. Email supports every meeting. SEO builds the long game. Justin runs investor networking (angels · OC Tech Angels) in parallel — relationships before the raise.**

04 · CHANNEL · LINKEDIN LINKEDIN

Primary: outbound + gift walkthroughs

What we do

- Tom + Jerod on **Reply.io**
- Fit A consultant connects (from Tom/Jerod list)
- Short plain-English notes
- Message ads: $100 Amazon / Kindle after meeting
- Book 20-min package walkthroughs

Plan math (monthly)

- **100–120** Fit A connects
- **8–12** walkthroughs held
- **2–4** pilots started
- **~1.5–2** new paying clients

This is the core engine for the ~50-firm beachhead.

Direct email + monthly newsletter

Direct email

- Only clean direct contacts
- Same pain → walkthrough CTA
- Consultants: margin angle
- Developers: time with GC (secondary)
- Same-day follow-up after every meeting

Monthly newsletter

- 2 useful field reads
- 1 pilot / walkthrough CTA
- Plain language — no AI hype
- Proof blocks when pilots produce them
- Keeps warm leads in the relationship

> **Email is not a separate campaign. It's the follow-through layer for LinkedIn meetings and pilots.**

Founder posts that support pipeline

Cadence

- **2–3 posts / week** combined (Tom + Jerod)
- Split ownership — don't both ghost
- Always a next step (walkthrough / pilot)

Content mix

- **Pain:** monthly package chaos / waiver chase
- **Process:** what bank-ready looks like
- **Proof:** pilot notes, time saved, quotes
- **Offer:** 20-min walkthrough

Rules

No feature spam. No AI hype. Field words only. Social makes COMPLY familiar so LinkedIn notes and gift ads convert easier.

04 · CHANNEL · SEO SEO

8-piece content machine on comply.capital

System

Same Brandastic agency SEO plan:

- 1 Ultimate guide
- 1 Listicle
- 1 Buyer guide
- 5 Thought-leadership pieces

Per category/feature node. Finish 8 before the next node.

First nodes

1. Draw packages for consultants
2. AI review · DEFICIENCY / WATCH / CLEAR
3. G702/G703 pay-app
4. Lien waivers
5. Document checklist

Every page CTA → walkthrough / pilot.

> **SEO won’t replace LinkedIn in month one. It compounds so inbound supports the same walkthrough offer later.**

04 · CHANNELS TOGETHER

One motion across all four

LinkedIn open → Email follow → Social proof → Walkthrough → Pilot → SEO proof pages

Channel	Owner	Weekly job	Success look
LinkedIn	Tom + Jerod	Connects, notes, gift ads, meetings	8–12 walkthroughs / mo
Email	Tom + Jerod	Openers + same-day follow-ups	Meetings assisted + newsletter sent
Social	Tom + Jerod	2–3 posts / week	Consistent presence + CTAs
SEO	Writer + Justin	Ship 8-pack nodes	Guides live + demo CTAs

HOW WE SELL · BUDGET LINKEDIN PILOTS

Where the money goes

Working monthly plan — same numbers for investors and the team. Reply.io is the spine.

CAMPAIGN	WHAT IT BUYS	MONTHLY
LinkedIn	**Reply.io** — Tom + Jerod seats Cap ~40 LinkedIn outreaches / person / day. Working floor 15–25 quality ICP connects/week each.	**$184.87**
LinkedIn ads	Gift walkthrough + consultant creative tests Scale only what books meetings.	**$500–$1,000**
Email	Apollo / data + non-CMAA sequences · newsletter Keep lean while Reply.io leads.	**$0–$200**
Social	Boost winners / short clips Organic posts free; boost optional.	**$0–$300**
SEO	comply.capital 8-pack support Background lane.	**$0–$400**
Pilots	Walkthrough gifts (~$100 after call) Variable with meetings booked.	**$200–$500**

WORKING MONTHLY CASH
Floor = Reply.io only · Starter with ads

~$900–$2,600
Reply.io $184.87 locked

Capacity that matters

Reply.io hard cap ≈ **40 LinkedIn outreaches per person per day**. Tom + Jerod together ≈ up to ~80/day theoretical — real floor stays quality-first.

Do not buy more seats until connect→walkthrough rate is proven.

Investor read

Low cash burn to test the door. Software spine ~$185/mo. Paid ads optional. Founder time is the real investment until pilots pay.

90-day cash picture

Lean: ~$185×3 ≈ **$555**
Starter: ~$1,200/mo ≈ **~$3,600**/quarter
Ads on: up to ~$2,600/mo ≈ **~$7,800**/quarter

Know the money before you need the money

Part of the COMPLY strategy: start networking with investors **now** — not the week a raise starts.
Relationship first. Pitch later.

Who

- **Angel investors** (construction / proptech / B2B SaaS angle)
- **OC Tech Angels** (Orange County)
- Other OC / SoCal angel groups and warm intros
- Operators who write angel checks + advise

Why now

- So faces are familiar when it's time to talk
- Feedback on story, wedge, and traction
- Warm paths beat cold decks
- Does **not** replace the consultant pilot engine

> **Goal of this motion: relationships and signal — not a priced round this quarter unless traction demands it.**

How we show up in OC

1 · Show up

- OC Tech Angels events / meetings
- Local angel mixers & demo nights
- Warm intros from Brandastic + founder network

2 · Simple story

- Consultant-first draw OS
- Beachhead ~50 firms → 20 clients
- Intelligence layer · humans decide
- Proof from pilots beats vapor

3 · Stay close

- Short follow-up after each meet
- Quarterly traction note when real
- Invite to walkthrough when useful
- Ask for advice before asking for money

Owners

Justin leads investor networking · **Tom / Jerod** join key rooms and product story · keep CRM notes on every angel touch

Light system so it actually happens

Cadence	Action	Output
Monthly	1+ OC Tech Angels / angel-group touch (event, intro, or coffee)	New faces + notes
Ongoing	Map 20–30 target angels / firms in OC + adjacent	Living list
After pilots	Share proof (clients, time saved, quotes) with warm investors	Credibility
When ready	Formal raise conversations with people who already know COMPLY	Faster diligence

Do

- Network early and consistently
- Lead with problem + beachhead + proof path
- Treat angels as long-term relationships

Don’t

- Distract founders from Fit A walkthroughs
- Pitch a huge raise with zero pilots
- Confuse investor story with consultant sales copy

PART 2B

2027 plan + ROI

Tom · Jerod · Justin approval pack — what we do, what it costs, what we should expect

A · APPROVAL

Lock this as the operating plan

Goals we approve

- Primary = consultants (~70%); secondary developers (~20%); lenders third (not ideal outbound)
- Q4 2026 = 1–5 paid pilots
- 2027 = 1 paying client Jan 1 → **20 by Dec 31**
- Pace ≈ **2 new paying clients / month**
- At 20 clients ≈ **$40k/mo · $480k/yr** (plan math)
- Long path ≈ 100–125 clients → **~$3M/yr**

Engines we fund

- LinkedIn outbound (Reply.io)
- Incentive walkthroughs ($100 / Kindle / AirPods)
- SEO 8-piece machine on comply.capital
- Newsletter + founder posts
- Proof from every pilot
- Pilot ~$300/project/mo on comply.capital

> **Yes from Tom + Jerod + Justin = we run this until we change it on purpose.**

Money math we manage to

~$24k
Yearly value / company at plan math
5 projects × ~$400/mo

~$2k
Monthly value / company at plan math
ramps up as projects stack

~$300
Pilot start / project / month
~60 days on 1–2 live jobs

Stage	Clients	Monthly recurring	Yearly run-rate
First paying logo	1	~$2,000	~$24,000
Mid-2027 path	10	~$20,000	~$240,000
End-2027 goal	**20**	**~$40,000**	**~$480,000**
$3M destination	~125	~$250,000	~$3,000,000

Label until full price locks. Early pilots can sit under plan math until more projects are on COMPLY.

What activity must produce

Working model for owners — track weekly and adjust. Numbers are targets, not guarantees.

Step	Monthly target	Working conversion	What it yields
Fit A connects / opens	120–200	—	Top of pipe
Conversations / replies	25–40	~15–25% of opens	Real interest
Walkthroughs held	10–16	~40–50% of conversations	Qualified meetings
Pilots started	3–5	~25–35% of walkthroughs	Live proof jobs
Paying clients added	**~2**	~40–60% of pilots over time	Hits 20 / year pace

If walkthroughs are low

Fix offer, list quality, incentive, or booking friction — not the website first.

If walkthroughs are fine but pilots are low

Fix demo flow, pilot terms, and proof — not more top-of-funnel spend.

A · COST VS RETURN

What we should expect from each engine

Engine	Monthly cost (working)	Main output	Healthy expectation
LinkedIn outbound	Time (Tom/Jerod) + Reply.io	Conversations + meetings	Majority of early meetings
Incentive gifts	$1,000–$3,000 cap example	Completed Fit A walkthroughs	~$100–$180 per held meeting
SEO 8-piece	Writer / asset budget	Rankings + inbound demos	Compounds; weak in month 1, real by months 3–9
Newsletter + posts	Time + light design	Trust + reply fuel	Supports close rate, not raw volume alone
Proof engine	Time after each pilot	Case notes + quotes	Raises pilot→paid and referrals

Simple ROI check

If one new paying client is worth ~$24k/year, then even **$3k–$6k** fully loaded cost to win that client is strong. If cost per new client stays under ~$8k–$10k while quality holds, keep scaling. If not, fix conversion before spend.

Gift budget → meetings → clients

$100
Standard Amazon gift after held meeting

Kindle / AirPods
Hard-to-book Fit A only

48 hrs
Gift delivery after meeting

Example month	Gifts fulfilled	Gift spend	If 1 pilot per 4–5 meetings	If 1 paid per 2 pilots
Lean	8	~$800–$1,200	1–2 pilots	~1 new path to paid
Base	12	~$1,200–$2,000	2–3 pilots	~1–2 toward paid
Push	20	~$2,000–$3,600	4–5 pilots	~2 paid-path outcomes

Kill rule: 30–40 held meetings + no real pilot path → pause gifts and fix ICP/message/demo before more spend.

What the 8-piece machine should return

Investment shape

- 1 node = 8 pieces
- First 3 nodes = 24 pieces
- Ship node-by-node (finish 8 before next)
- Same agency system as Brandastic SEO playbook

Expectation by time

- **Days 1–30:** map + first drafts, little traffic
- **Days 31–90:** Node A live, early rankings/demo assists
- **Months 4–9:** compounding inbound + sales leave-behinds
- **Always:** every page CTA to walkthrough/pilot

ROI read

SEO is not month-1 paid media. Judge it on: rankings for draw/monitoring terms · assisted walkthroughs · sales usage of guides · lower cost per meeting over time. One inbound paying client pays for a lot of content.

If we hit the activity targets

Outcome	Clients	MRR	ARR run-rate	What had to work
Floor	10	~$20k	~$240k	~1 new client / mo average
Plan	**20**	**~$40k**	**~$480k**	**~2 new clients / mo + project stack**
Stretch	30	~$60k	~$720k	Strong referrals + faster expand

To clear plan

About 19 net new clients after the first logo · ~2 / month · pilots converting · projects expanding past 1–2 jobs

To aim at multi-million later

Keep the same motion · raise projects/client · add lender intros after proof · grow past 20 toward ~100–125 logos

How COMPLY wins the market

Rabbet path

Bank first. Developers pay most of the bill. Long cycles.

COMPLY path

Consultant first → cleaner bank package → proof → bank trust → expand projects inside the firm.

> **One line: COMPLY helps construction consultants run monthly draws as a system — cleaner packages, less chase, bank-ready trail.**

Own the job

- After meeting only
- 1 / firm / quarter

Who

- Fit A consultants only
- Owner/principal/senior reviewer
- Monitors draws for banks

20 minutes

Their process → COMPLY on a draw → pilot if it fits → gift in 48h

Offer line

“Consultants: 20 minutes on how to put more margin behind each draw cycle. Developers: how to save time keeping up with your GC. Gift card after the live walkthrough.”

05B · AD PATTERN

The gift message-ad that sells meetings

Directive
Promoted · reference pattern

Lauren (Ritchie) Marks

Hey %FIRSTNAME%,

29 mins, a $105 Amazon gift card, and you'll find out if %COMPANYNAME%'s product feed is quietly killing your margins.

I lead Directive Commerce, the only agency obsessed with B2B ecommerce advertising.

A bad feed and poor ads don't just lose clicks, it loses margin. We'll show you exactly how to fix it.

Take a call with one of our experts, and I'll send you the gift card right after.

Yes! Book Call

Not sure? Tell me more

Structure we copy

- Time + gift + money outcome in line 1
- Who you help + sharp pain
- What the bad process costs them
- Walkthrough/call → gift after
- Two buttons: hard yes + soft yes

COMPLY angles:
Consultants (70%): one firm → many lender/developer deals
Developers (20%): ton of demand · faster funded draws
Lenders (10% · third): own stack · usually won't buy direct

05B · COMPLY ADS

Consultant margin · Developer time with GC

COMPLY · Consultants (70%)
Fit A · build margin

Tom / Jerod

Hey %FIRSTNAME%,

20 minutes, a $100 Amazon gift card, and I'll show you how much margin your firm is leaving on the table every draw cycle.

I work with lender-side construction consultants. COMPLY helps your team clear monthly packages faster — less waiver chase, cleaner bank-ready trail.

That time back is margin: more jobs per reviewer, fewer fire drills, tighter recommendations to the bank.

Take a short walkthrough, and I'll send the gift card right after the call.

Interested?

Yes — book walkthrough

Not sure? Tell me more

Primary: margin behind the monitoring firm.

COMPLY · Developers (20%)
Secondary · real demand

Tom / Jerod

Hey %FIRSTNAME%,

20 minutes, a $100 Amazon gift card, and I'll show you how much time you can save keeping up with your GC on monthly draws.

You shouldn't have to double-check so many things, chase the same docs twice, or resubmit because the package wasn't bank-ready the first time.

COMPLY keeps the monitoring path clearer — less back-and-forth, faster funding path. Best when your bank or consultant is in the loop.

Take a short walkthrough, and I'll send the gift card right after the call.

Interested?

Yes — book walkthrough

Not sure? Tell me more

Secondary: less double-checking with the GC. Not main wallet.

05B · LENDER AD (10% · THIRD)

Secondary message — after consultant proof

COMPLY · Lenders (10% · third)
Not ideal outbound · own stack

Tom / Jerod

Hey %FIRSTNAME%,

20 minutes, a $100 Amazon gift card, and I'll show you how to get more consistent draw packages across your book.

I work with commercial construction lenders and the consultants they already trust. COMPLY helps monitoring firms deliver cleaner, bank-ready packages — fewer surprises, clearer trail.

Take a short walkthrough (ideally with your monitoring partner), and I'll send the gift card right after.

Interested?

Yes — book walkthrough

Not sure? Tell me more

Rules

- Do not lead with pure bank enterprise RFP
- Prefer joint walkthrough with their consultant
- Gift still after completed meeting
- Same pilot path on comply.capital

Segment cheat sheet
Consultant = margin
Developer = time with GC
Lender = consistency / fewer surprises

8-piece machine on comply.capital

Rule

Per category/service/sub-service: ultimate guide + listicle + buyer guide + 5 thought-leadership = **8**.

First 3 nodes

1. Draw management for lender consultants
2. Lien waiver + pay-app workflow
3. Construction loan monitoring software

#	Node A titles (start here)
1	Ultimate Guide to Monthly Construction Draw Packages for Lender Consultants
2	Top Approaches & Tools for Construction Draw Management in 2027
3	What to Look for in Draw Software if You Monitor Loans for Banks
4–8	Breaks every month · bank checklist · spreadsheet vs system · waiver chase · what bank-ready means

A · PROOF + NURTURE

Raise close rate after the meeting

Proof engine

- Time before/after
- Cleaner packages / fewer kicks
- Consultant quote
- Reuse in sales, SEO, newsletter

Nurture

- Monthly newsletter (2 reads + CTA)
- 2–3 founder posts / week
- Always next step: walkthrough → pilot → expand

ROI role

These do not replace outbound. They make each meeting and each pilot worth more — higher pilot→paid, more projects/client, more referrals.

A · 90 DAYS

Quarter plan with expected outputs

Days 1–30

- Approve plan
- Fit A + incentives live
- 10+ walkthroughs path
- SEO map + Node A start
- 1–2 pilots starting

Days 31–60

- Convert pilots
- Node A 8-pack live
- First proof posts
- Improve show→pilot rate
- Steady ~2 paid-path/mo aim

Days 61–90

- 1–5 pilots Q4 bar
- Node B underway
- Referral asks
- 2027 pipeline loaded
- Scoreboard habit locked

Who owns the ROI levers

People

- **Tom** — outbound, offers, walkthroughs
- **Jerod** — outbound, pilots, product proof
- **Justin** — ICP, gift cap, scoreboard, network
- **Writer** — SEO 8-packs, newsletter

Weekly scoreboard

- Connects / offers / meetings
- Show rate
- Pilots started / paid
- Gift spend vs meetings
- Content shipped
- Proof captured

A · DECISION

Tom & Jerod — approve to run

YES means

- Consultants first (70%); developers second; lenders third
- Incentive walkthroughs on Fit A
- SEO Node A starts
- LinkedIn/Reply.io weekly motion
- Pilot on comply.capital
- Manage to ~2 new paying clients / month in 2027
- Path: $480k run-rate at 20 → multi-million with scale

Label later (don’t block)

- Exact full price inside $300–$600
- Exact monthly gift cap number
- Writer capacity for 8-pack speed
- Final pilot success metric wording

> **Approval ask: lock this full plan + ROI model as the 2027 game plan.**

Marcus sequences · non-CMAA

COLD / NETWORK / APOLLO PATH. CMAA SEQUENCES ARE ALREADY RUNNING — USE THIS SET FOR EVERYONE ELSE.

LINKEDIN CONNECT

Hey {{FirstName}} — I work with construction consultants who run monthly draw / pay-app review for lenders. Would be good to connect.

LINKEDIN AFTER ACCEPT

Thanks for connecting, {{FirstName}}!

We built COMPLY for firms doing monthly construction loan / draw review for lenders — pay apps, lien waivers, plan & cost, bank-ready packages.

If useful: 20-min walkthrough on one redacted package, then a pilot on 1–2 live loans.
https://comply.capital

LINKEDIN BUMP (DAY 4–7)

{{FirstName}} — quick bump. If draw packages are still living in email this month, happy to walk one redacted file for 20 minutes. No deck. https://comply.capital

EMAIL 1

Subject: Monthly draw review at {{Company}}

Hi {{FirstName}},

I work with lender's construction consultants — teams doing monthly pay-app / draw monitoring for banks.

Most firms we talk to are buried in G702/G703 packages, waiver chases, and email threads — and still need a defensible recommendation to the lender.

Worth 20 minutes on one redacted package? If it's a fit, we pilot 1–2 live loans.
https://comply.capital

Tom · COMPLY

EMAIL 2 (BUMP)

Subject: Re: Monthly draw review at {{Company}}

Hi {{FirstName}},

Circling back once. If useful, we can screen-share one redacted pay-app package and show how COMPLY flags gaps before the bank sees them.

20 minutes. You still make every call. Pilot is 1–2 live loans if it fits.
https://comply.capital

Tom · COMPLY

Always-on content

NEWSLETTER CLOSE

Running construction loan monitoring for lenders?

We're opening a few pilot seats for consultant firms:
• 20-minute walkthrough on one redacted draw package
• Pilot on 1–2 live loans
• You still make every call

Start → https://comply.capital

POST · PAIN

Most construction draw delays aren't "bad GCs."
They're incomplete packages — missing waivers, fuzzy G702 math, no single checklist.

If you run monitoring for lenders, what's still stuck in email?

POST · CTA

Short draw package walkthroughs with construction consultants this month.
20 minutes. One redacted package. No deck.
DM me if you want in.

06 · CAMPAIGN SETS

Color-coded so the plan stays clear

One motion, four lanes. Same COMPLY story — different color when we build ads, posts, sequences, and SEO.

LinkedIn · Consultant 70% | Email / Apollo sequences | Social · founder posts | SEO · comply.capital | Lender 10% · third · not ideal outbound

Primary set · Consultants

Reply.io LinkedIn + gift walkthrough ads + non-CMAA email. Pain = endless monthly paperwork. CTA = 20-min redacted package → pilot.

Email set · cold + nurture

Apollo Fit A sequences (no CMAA rebuild). Newsletter monthly. Same open → walkthrough → pilot ladder.

Social set · always-on

2–3 founder posts/week. Visual ads from the paperwork / CLEAR-WATCH-DEFICIENCY story. Comments → DM walkthrough.

SEO set · 8-pack machine

comply.capital nodes that match the pain words consultants search. Supports outbound; not the tip of the spear.

01 · DISCOVERY SNAPSHOT

What we've learned about COMPLY

Strengths

- Real monthly pain: draw packages, waiver chase, bank-ready trail.
- Clear wedge: help the firm the bank already hired — not another bank OS.
- Low pilot bar (~$300/project/mo) vs enterprise bank software.
- CMAA warm track already running; founders can do live walkthroughs.
- Room to scale with cold / network / Apollo sequences next.

Opportunities

BUILD THE FOUNDATION

Lock tracking, Reply.io sequences, creative set, and walkthrough CTA on comply.capital.

ACQUIRE QUALIFIED FIRMS

Consultants first (~70%) — onboard many deals. Developers ~20%. Lenders third — don't lead there.

CONVERT & CAPTURE DEMAND

20-min redacted package → 1–2 live loan pilots. Gift walkthrough ads for meeting volume.

MEASURE, LEARN & SCALE

Scoreboard weekly. Double what books walkthroughs. Developers second. Lenders not ideal outbound.

02 · TOTAL ADDRESSABLE MARKET

Commercial deals × $300 / draw

Goal: 3% of this market ≈ **$3M** (conservative). Full market at $300/draw ≈ ~$100M.

TAM is not "all of CRE." It's **active U.S. commercial construction deals that run monthly draws** — priced at COMPLY's per-project fee.

How we size it

- U.S. banks hold ~**$450B+** construction & land-development loans (C&D).
- Broader construction-loan book (banks + others) can run higher (~$600B+ class).
- At ~$15–25M average active loan → rough **~20k–35k** financed projects in motion.
- Working band for draw-monitored commercial deals: **~15k–40k** projects (labeled assumption).
- COMPLY fee: **$300–$600 / project / month** → **$3.6k–$7.2k / project / year**.

TAM math (owner view)

~$90–180M

ARR mid case · ~25k deals × $300–$600/mo

~$50–290M

ARR band · 15k–40k deals × price range

Monthly dollars: ~25k deals × $450 mid ≈ **~$11M / month** software capacity. That's the ceiling if every draw-monitored commercial job paid COMPLY.

Who we sell

70% consultants — easiest door; one firm onboards many lender/developer deals.
20% developers — real demand, secondary.
10% lenders — third; have their own stack; usually won't buy us direct.

SAM (serviceable)

Deals touched by lender-side consultants + developers who need package help — not every bank desk. Still tens of thousands of projects over a cycle; near Fit A consultant universe is the tip of the spear.

SOM (near-term)

$3M ARR path ≈ 100–125 firms × ~$24k/yr (5 projects × ~$400/mo). Q4-class goal stays **1–5 pilots**, not TAM.

THE GOAL · PLAIN ENGLISH

3% of the draw market ≈ $3M

Conservative target. Same number for investors and the team.

The math

- **Price:** $300 per draw (project / month)
- **Goal:** about **3%** of the draw software market
- **That 3% ≈ $3,000,000** ARR (conservative)
- **Full market at this price ≈ $100M** ARR ($3M ÷ 3%)

At $300/mo, $3M means roughly **~833 concurrent projects** paying (or ~10,000 project-months in a year).

How we get there

- Not “win every bank OS deal”
- Win the **package desk** — consultants first (70%), then developers (20%)
- One firm can bring many draws onto COMPLY
- Near-term: **1–5 live pilots** → path to logos → $3M

Pilot stays simple: ~$300 / project / month on comply.capital

$300
per draw / mo
3%
of draw market
$3M
conservative goal

METHODOLOGY · WHAT CHANGES THE GAME

We know exactly who to sell to

Most competitors spray the market. We don't. Before we spend time on anyone, we already know the **names, numbers, and fit** — double-checked.

Our edge

- **Exact target market** — not a vague industry list
- **Names + numbers** — real firms and people, not guesses
- **Apollo + human review** — pulled the data, then double-checked every row
- **Ideal-fit only** — Fit A consultants first; reject GC/mega platforms/competitor SW
- **Time is protected** — no outreach until the account clears the bar

How we use it

- Build the list once → company-first, not title-only
- Score fit (A-core / secondary / no)
- Only then: LinkedIn · email · walkthrough
- CMAA warm track stays separate; cold lists are cleaned the same way
- Result: every hour Tom & Jerod spend is on a real buyer

Why this beats spray-and-pray software sales

Rabbet and bank platforms sell wide. We sell narrow on purpose: the firms that already live in monthly draw packages. The list is the product of the methodology — so the motion stays sharp and the $300/draw path to 3% / $3M stays honest.

How we'll measure success

Success indicators

- Qualified consultant conversations
- Walkthroughs booked
- Pilots live (1–5 Q4-class)
- Time-to-clear package proof
- Paying logos → $480k path

Brand awareness	• LinkedIn impressions • Profile follows (Tom/Jerod)	• Post reach / frequency • Post engagement rate
Audience growth	• ICP connects accepted • comply.capital new users	• Newsletter subscribers • Returning visitors
Engagement	• CTR on ads / posts • Reply rate (LI + email)	• Walkthrough page views • Positive ICP comments
Conversion	• Walkthroughs booked • Pilot → paid	• Pilots started • CAC (blended)
Retention	• Pilot renew / expand • NPS / referral asks	• Projects per firm • Logo LTV path

Discovery → launch → optimize

Phase 1 · Days 1–30

1. **ALIGN**
   Goals, ICP rules, success metrics, non-CMAA copy
2. **AUDIT**
   Reply.io, lists, comply.capital CTA, tracking
3. **COMPETITOR**
   Rabbet wedge + endless-paperwork creative
4. **STRATEGIZE**
   Channel mix: LI · Email · Social · SEO
5. **PLAN**
   Sequences, gift ads, newsletter #1, 8-pack

Phase 2 · Days 31–60

1. **LAUNCH**
   Cold LI + email sequences · gift walkthrough ads
2. **CREATE**
   Visual ads + founder posts 2–3×/week
3. **ENGAGE**
   Newsletter live · comment → DM path
4. **ACTIVATE**
   Book walkthroughs · first pilots on live loans
5. **OPTIMIZE**
   SEO Node A drafts · tracking QA

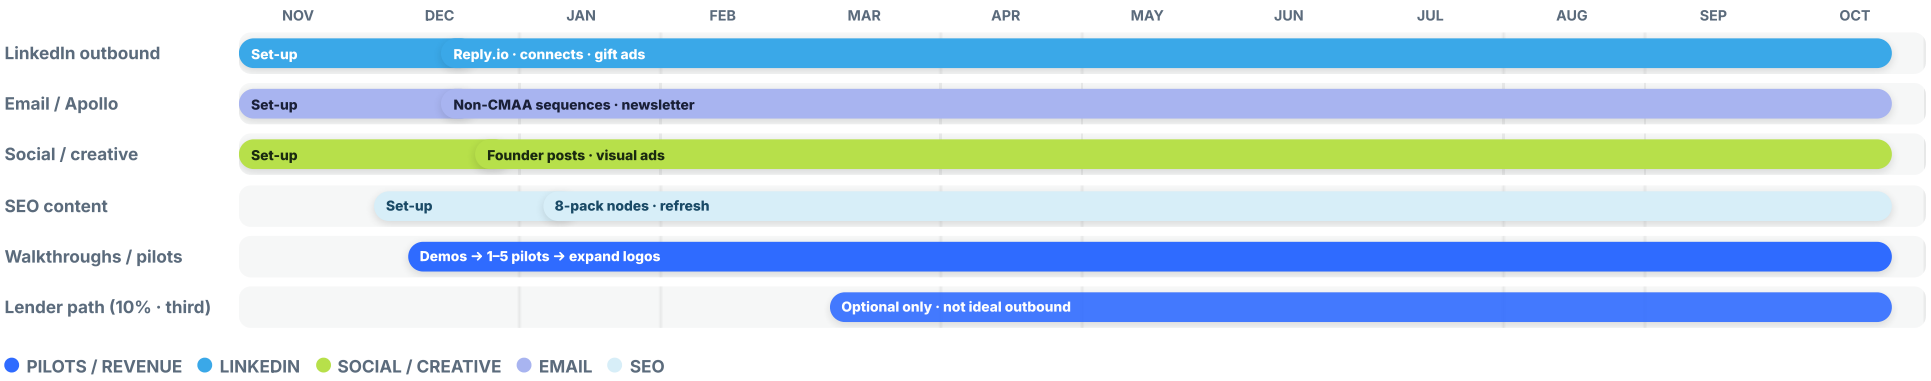

Phase 3 · Days 61–90

1. **OPTIMIZE**
   Kill weak copy · scale what books meetings
2. **SCALE**
   Expand Fit A lookalikes · creative winners
3. **CONVERT**
   Walkthrough → pilot · proof stories
4. **REPORT**
   Monthly scoreboard + 2027 ROI check-in

07 · LONG-TERM ROADMAP

Example 12-month build

Start now · keep CMAA as-is · scale non-CMAA outbound + content machine.

Cadence Tom & Jerod can run

Day	Focus
Mon	Scoreboard: connects, replies, walkthroughs booked, pilots live. Set week targets.
Tue	Tom + Jerod LinkedIn via Reply.io (connects + posts).
Wed	Email / Apollo. Newsletter or blog push. 1 post.
Thu	Walkthroughs + pilot calls. Engage ICP posts.
Fri	20–30 min standup. CTA post. Log pains → next week's posts.

Volume floor

Tom + Jerod on LinkedIn via Reply.io: 15–25 ICP connects/week · same-day follow-up · 2–3 founder posts/week (split) · 25–40 emails/week · 1 newsletter/month

07 · DAYS 1–30

Engine on

Week 1

Approve non-CMAA sequence copy. CMAA track stays as-is. Load Apollo + network lists into Reply.io. Assign newsletter #1.

Week 2

Apollo top 15 of 34. Launch cold LinkedIn + email sequences. 2–3 posts. Book first walkthroughs.

Week 3

Follow-ups. Run walkthroughs. Draft newsletter (2 reads + pilot CTA).

Week 4

Send newsletter. Amplify on LinkedIn. Offer pilots where walkthrough clicked.

07 · DAYS 31–90

Pilots + proof

W5–6

1–2 pilots live. Weekly check-ins. Keep outbound. Expand lookalikes.

W7–8

Newsletter #2. More warm walkthroughs. Lender only with consultant path.

W9–10

Push 3–5 pilots. Write proof line: time saved, fewer chases, cleaner bank package.

W11–12

Newsletter #3 with proof. Year-end: 1–5 pilots · 1 story · 2027 plan for ~15–25 paying.

Scoreboard

Network on · newsletter habit · posts steady · **1–5 pilots · 1 proof story** · math path to $3M still clear

How not to drop the ball

Tom owns

- ➜ LinkedIn connect + post via **Reply.io** (with Jerod)
- ➜ Email outbound · book and run walkthroughs
- ➜ CRM / list hygiene (Marcus-first)
- ➜ Rabbet objection line ready

Jerod owns

- ➜ LinkedIn connect + post via **Reply.io** (with Tom)
- ➜ Pilot setup on comply.capital
- ➜ Live-loan success + proof capture
- ➜ Expand projects after pilot

Walkthrough (20 min)

- Their process today (3 min)
- One redacted package together (10)
- Where time/risk hides (4)
- COMPLY on that same package (3)
- Ask: 1–2 live jobs pilot?

Pilot success metrics

- Time to bank-ready recommendation
- Chase emails before review starts
- Misses caught before funding
- Would they put a 3rd job on it?

What “good” vs “fix” looks like

Winning pattern

- Conversations every week with Marcus-types
- Walkthroughs on calendar (not endless demos)
- Pilots on real loans
- One written proof story by year-end
- Price confirmed; projects expanding

Stop / fix pattern

- Only bank RFPs and deck tours
- Chasing Jordan with no lender path
- Feature dumps and AI buzzwords
- Zero walkthroughs in a 2-week stretch
- Pilots with no success metrics

> **If it is not moving a construction consultant toward a product demo or a paid pilot, skip it.**

09 · NEXT STEPS

This week — approve & run

Owners

- **Tom** — LinkedIn (Reply.io) + email + walkthroughs
- **Jerod** — LinkedIn (Reply.io) + pilots + proof
- **Justin** — ICP, scoreboard, network, math
- **Writer** — 2 blogs/mo + newsletter

Checklist

- Marcus 70%; Jordan 20%; Elena third (not ideal outbound)
- Q4 bar = 1–5 pilots by Dec
- **Tom + Jerod + Justin approve 2027 plan + ROI model**
- Approve LinkedIn + email copy
- Keep CMAA track running; launch non-CMAA LinkedIn + email sequences this week
- Launch Fit A incentive walkthroughs
- Start SEO Node A 8-pack
- Confirm full price $300–$600
- Agree 2–3 pilot metrics + weekly ROI scoreboard

> **LinkedIn opens the door. Newsletter keeps the relationship. Social keeps COMPLY visible. Walkthroughs create belief. Pilots prove it. Math shows how pilots become $3M.**
